

# LEADERSHIP AND MANAGEMENT COMPETENCIES OF PUBLIC ELEMENTARY SCHOOL HEADS: BASIS FOR CAPACITY DEVELOPMENT PROGRAM

**NOEL P. ESPIRITU** 

Institute of Graduate and Professional Studies

Lyceum-Northwestern University

Dagupan City

Abstract: A great responsibility was imparted on the job of the school heads for the success of the school. Their skills and capabilities influenced the attainment of the school's objectives. To ensure the effective quality-based education services, the researcher aimed to describe the school heads' leadership and management competencies and its relationship to their profile (age, highest educational attainment, training, years of administrative experience, and rank). Participants were the 56 school heads in the elementary schools of the Third Congressional District of Pangasinan. The researcher used the National Competency –Based Standards for School Heads Training and Development Needs Assessment (NCBSSH-TDNA) which was a self-assessment tool in determining the level of the school heads' leadership and management competencies. Results found out that most of the listed competencies have a low positive relationship with the profile of the school heads. Training and educational preparation which both connotes mostly a negative relationship with the competencies were also given emphasis in this study. In line with this, a proposed capacity program development is recommended.

Keywords: school heads, leadership, management, competencies, capacity development

### INTRODUCTION

Decentralization and school-based management have significantly transformed the traditional roles of school principals, turning them into empowered leaders (Sindhvad, 2009). By shifting authority and power from the central education office to the principals, the school leaders now have more autonomy in managing the school system. This shift is clearly outlined in Section 6.1, Rule VI of RA 9155, which defines the school head as the individual responsible for both administrative and instructional supervision within the school. Additionally, the school head is expected to exhibit a range of leadership competencies, including educational leadership, people leadership, and strategic leadership, as stated in DepED Order No. 42, s.2007. In the 21st century, principals are no longer just responsible for the physical aspects of the school; they are expected to be instructional leaders who can cultivate a team capable of delivering high-quality education.

In the implementation of school-based management, the direct delivery of quality education services depends on the leadership and management competence of the principals. Ruyck (2005) asserted that principals are required to possess a variety of skills in order to realize sustainable success in an administrative position.

In their study conducted in 2013, Gajardo and De Los Rios discussed the increasing importance of professional competencies as crucial components in enhancing the ability of professionals to carry out their work with effectiveness and efficiency, ultimately leading to the attainment of desired outcomes. They highlighted the significance of school leadership in driving school improvement, emphasizing that school administrators are tasked with showcasing tangible results and utilizing data-driven approaches to inform their decision-making processes. According to Hess and Kelly (2002), the role of school heads in fostering a culture of continuous improvement and accountability cannot be understated, as they play a pivotal role in shaping the overall success of educational institutions.

And, with the National Adoption and Implementation of the National Competency-Based Standards for School Heads as stipulated in Department Order no.2, series 2010, the responsibilities of principals and the key competencies they require have significantly increased for they are expected to perform the following functions such as: School leadership, Instructional Leadership, Creating a Student Centered Climate, Human Resources Management and Professional Development, Parents

Involvement and Community Partnership, School Management and Operations and Personal and Professional Attributes and Interpersonal Effectiveness.

The success or failure of school governance is heavily dependent on the role of principals in providing efficient and effective school management. According to Normore (2004), the evolving role of school principals remains crucial in determining the success of a school. It is widely believed that principals play a key role in shaping the overall performance of a school. However, if school leaders lack the necessary skills and competencies to effectively manage the school, it can lead to a critical situation where the school struggles to meet the target standards set in the Key Results Area of Basic Education Services. This can ultimately result in poor school performance, low academic achievement among students, and a lack of competence among teachers. Therefore, the role of the principal in school governance is essential in ensuring the overall success and effectiveness of the educational institution.

School heads play a crucial role as catalysts of change within educational institutions. The pursuit of quality education, no matter how challenging or difficult it may appear, ultimately hinges on the leadership qualities exhibited by school heads. The competence and effectiveness of school leaders directly impact the overall success of the school. A study conducted by the United Nations International Children's Emergency Fund (UNICEF) in Lao People's Democratic Republic (PDR) underscored the vital importance of skilled school principals in offering direction and accountability for enhancing the educational outcomes of all students. This research emphasizes the significant influence that school heads have on the academic development and growth of their students, highlighting the essential nature of strong and capable leadership within educational settings.

School leaders in highly effective schools play a crucial role in fostering a positive learning environment. They achieve this by promoting collaboration among teachers, providing necessary support and resources, engaging parents as partners in their children's education, and building trust and respect within the school and community. According to UNICEF (2021), these actions are essential in improving student learning outcomes and achieving the long-term goal of developing quality, life-long learners. As such, school leaders are expected to possess a wide range of competencies in order to effectively carry out their duties and contribute to the global aim of providing high-quality education for all students. By prioritizing collaboration, support, engagement, and trust, school leaders can create a conductive learning environment where students can thrive and reach their full potential.

Likewise, in the Philippines, it has become the vision of the Department of Education to produce Filipinos who passionately love their country and whose values and competencies enable them to realize their full potential and contribute meaningfully to building the nation" (2013).

It lays the cornerstone of Republic Act 9155, otherwise known as the Governance of Basic Education of 2001 declaring schools as the heart of the formal education system. Categorically, RA 9155 empowers school heads to realize said vision.

As an empowered authority in schools, school heads perform dual roles, as administrative manager and as instructional leader. Hence, school heads enjoy decisive latitude to dispense not only quantity but also quality education whose by-products are learners imbued with competitive lifelong skills and desirable values to enable them become active community participants in the future. Anything excess or want in the execution of such functions ultimately creates adverse impact on formal education system in schools. Such occurrence is, obviously, the accountability of school heads. The challenge to keep every school head in route to quality formal education is dependent on several yet interdependent factors. Even with clear vision in mind and achievable goals at heart victory over quality hangs mid-air unless a technical road map is put in place. Therefore, school heads necessarily must adhere to specific professional standards and competencies that will help them manage schools and lead people to realize a common vision and goals. In response to this, the Philippine Professional Standards for School Heads (PPSSH) came into birth as DepEd recognizes the importance of professional standards in the continuing professional development as well as the advancement of school heads based on the principle of career-long learning. The PPSSH was made into a policy through DepEd Order No. 24, 2020, otherwise known as the National Adoption and Implementation of the Philippine Professional Standards for School Heads (PPSSH) which is made to institutionalize it as a public statement of professional accountability for school heads to reflect on and assess their own practice as they aspire for and pursue professional development.

In the Philippine Public Basic Education Sector, the selection of competent school heads is done through a qualifying examination or known as "Principals' Test. Further, to pass the principals' test and be consequently promoted to the principal position will not guarantee that you can manage the school properly. In the Division Pangasinan I, some of the principals that I have interviewed had made mentioned that they have deficiencies in school leadership as well as instructional leadership competencies. Others have complained that they experienced difficulties in school operation and management and community linkages. Other principals were expert in human resource management but their competency in creating student centered learning climate was deficient. Though there are in-service management trainings that provide capacity building program for the principals, unfortunately, the trainings themselves do not fit or address the needs to improve the competencies of the principals in the certain domains.

Gentilucci, Denti and Guaglianone (2013) had explained that though principals received preparatory training at institutes of higher education or may have prior administrative experience, they often lack the skills, knowledge and dispositions necessary to meet demanding challenges created by their multifaceted leadership roles. As a result, mediocrity in school leadership and management may prevail.

Cognizant to these problems encountered by the public elementary school principals, there is a need to conduct an empirical study regarding their competencies and whether their age, educational preparation, trainings attended, present position and years of experience have a significant influence to their competencies as an effective principal. In the study of Cavajos (2012), an assessment of principals' competencies associated with effective school principals is important to consider and becomes an integral part for the selection process of principals as well as an indicator in managing schools.

Therefore, to ensure the effective delivery of quality basic education services, the researcher conducted a study regarding the leadership and management competencies of the elementary school principals in the Division of Mabalacat City, so as to improve the efficiency and effectiveness in the school governance as well as to leverage the current practices into competency based standard leadership and managerial practices among our principals. In the process, a proposed capacity development program is recommended specifically to address what specific competencies of the seven domains that needs to be strengthened and required immediate intervention.

The researcher adopted the National Competency – Based Standards for School Heads Training and Development Needs Assessment as a main tool to evaluate the school leadership and management competencies of the school heads in the Second

Congressional District of Pangasinan under the Schools Division Office I Pangasinan. Further, the NCBS-SH framework redefines the function of school heads through the list of standard competencies in the seven domains and therefore explains that an effective school head should be able to implement continuous school improvement, produce better learning outcomes among the learners and able to reshape the institutional culture in our organizational system.

To substantiate the undertakings of the study, the following concept of school leadership and management competencies and related literature and studies are further discussed thoroughly.

### Statement of the Problem

The general purpose of the study is to describe the leadership and management competencies of the public elementary school heads of the Third Congressional District of Schools Division Office I Pangasinan and its relationship to their profile. The result of the study was then used as a basis for the capacity development program to be proposed.

Specifically, the study sought to answer the following sub-problems:

- 1. What is the profile of the elementary school heads in terms of:
  - 1.1. age;
  - 1.2. educational preparation;
  - 1.3. training attended;
  - 1.4. years of experience as school head;
  - 1.5. present position/rank;
- 2. What is the level of school heads' leadership and management competencies as indicated in their function on RA 9155:
- 1. School Leadership
  - 1.1. Developing and Communicating Vision, Mission, Goals and Objectives
  - 1.2. Data-based Strategic Planning
  - 1.3. Problem Solving
  - 1.4. Building High Performance Teams
  - 1.5. Coordinating with Others
  - 1.6. Leading and Managing Change
- 2. Instructional Leadership
  - 2.1. Assessment of Learning
  - 2.2. Developing Programs and/or Adapting Existing Programs
  - 2.3. Implementing Programs for Instructional Improvement
  - 2.4. Instructional Supervision
- 3. Creating a Student-Centered Learning Climate
  - 3.1. Setting high social & academic expectations
  - 3.2. Creating school environments focused on the needs of the learner
- 4. Human Resources Management and Professional Development
  - 4.1. Creating a Professional Learning Community
  - 4.2. Recruitment & Hiring
  - 4.3. Managing Performance of Teachers and Staff
- 5. Parents' Involvement and Community Partnership
  - 5.1. Parental Involvement
  - 5.2. External Community Partnership
- 6. School Management and Operations
  - 6.1. Managing School Operations
  - 6.2. Fiscal Management
  - 6.3. Use of Technology in Management of Operations
- 7. Personal and Professional Attributes and Interpersonal Effectiveness
  - 7.1. Professionalism
  - 7.2. Communication
  - 7.3. Interpersonal Sensitivity
- 3. Is there a significant relationship between the profile of the school heads and their school leadership and management competencies?
- 4. Based from the findings, what kind of school leadership and management program can be developed to improve the leadership and management competencies of the public elementary school heads?

### METHODOLOGY

# Research Design

The study adopted the descriptive-correlational type of research as it primarily aims to describe the level of leadership and management competencies of the public elementary school heads and to determine the relationship of its variables.

It is descriptive because the study described the following concerns: describe the profile of the participants and determine the level of school heads' leadership and management competencies as indicated in their function on RA 9155 and it is correlational because it tries to describe the relationship between the profile of the school heads and their school leadership and management competencies.

# **Sources of Data**

The participants of the study are the select public elementary school heads from the third congressional district of Schools Division Office I Pangasinan namely: Bayambang, Malasiqui, Calasiao, Sta. Barbara, and Mapandan.

The researcher took the population of 56 public elementary school heads as the actual participants of the study. Stratified random sampling was used.

## **Instrumentation and Data Collection**

The major instrument which was used in gathering data is the questionnaire. The researcher adopted the National Competency Based Standard for School Heads Training and Development Needs Assessment as a main tool to evaluate the school leadership and management competencies among the school heads in the Third Congressional District of Division of Pangasinan I.

Part I is the Principal Profile Descriptive Form. This part of the questionnaire elicited information regarding the professional profile of the school heads such as age; educational preparation; training attended; years of experience as school head and present position or rank.

Part II is the School Head's Leadership Management Competencies Checklist. This part described the level of leadership and management competencies of principals based on the seven domains of National Competency Based School Head Standards. The likert scale was used to determine the quantitative and qualitative interpretation of the responses of the participants.

The conduct of the research was formally requested by the researcher through a letter addressed to the Schools Division Superintendent of the Division of SDO1 Pangasinan. The letter contained the formal request to administer the questionnaire to the public elementary school heads of the SDO1 Pangasinan.

The data gathering procedure was personally undertaken by the researcher. This was done through a google link sent to the principal-participants. Before the actual distribution of the questionnaire, the objectives of the research were explained to ensure full understanding and objectivity in indicating their responses. Also, the schedule of the retrieval was agreed on the date of the distribution of the questionnaire. The obtained data was organized and subjected to appropriate statistical analysis.

# **Tools for Data Analysis**

The following statistical techniques were employed to facilitate the quantitative interpretation of the data:

- 1. Frequency and percentage distribution, to summarize the description of the profile of the participants.
- 2. Weighted means to describe the level of school leadership and management competencies of the public elementary school heads as indicated on their function on RA 9155.

	Level of Leadership and Man	agement Competencies
Scale Value	Descriptive Rating	Range of the Weighted Means
4	Outstanding	3.51 - 4.00
3	Very Satisfactory	2.51 - 3.50
2	Satisfactory	1.51 - 2.50
1	Fair	1.00 - 1.50

3. Pearson r, to determine the significant association between the profile and the level of school leadership and management competencies of the participants.

# RESULTS AND DISCUSSION

This chapter deals with the presentation, analysis and interpretation of the data gathered relative to sub-problems in the study.

# **Profile of the School Heads**

Table 1. Profile of the School Heads in Terms of Age

Age	Frequency	Percentage
31-40	4	7.14
41-50	34	60.71
51-60	18	32.15
Total	56	100

It can be gleaned from the table that the highest number of responses, which comprised 60.71% of the respondents, is 41-50 years old. While 32.14% are within the range of 51-60 years old, it is noted that only 7.14% were under 31-40 years of age and below.

Table 2. Profile of the School Heads in Terms of Highest Educational Attainment

Highest Educational Attainment	Frequency	Percentage
Doctorate Degree	23	41.07
With EdD/PhD Degree Units	30	53.57
Master's Degree	3	5.36
Total	56	100

It appeared from the table that 53.57% or more than half of the respondents had units in Doctoral. While 41.07% of the school heads earned units in doctorate degree. Meanwhile, 5.36% had yet to pursue higher education. It is crystal clear that majority of the respondents are in the process of completing their graduate studies.

**Table 3. Relevant Training Attended** 

Relevant Trainings Attended	Frequency	Percentage
International	27	48.21
National	56	100
Regional	56	100

\*Multiple Responses

The table indicates that most of the respondents have obtained training in School Based Management and Leadership Training. Majority of the training they have attended came from the National and Regional levels.

**Table 4. Administrative Experience as School Heads** 

Experience as School Heads	Frequency	Percentage
1-10 years	24	42.86
11-20 years	29	51.78
21-30 years	3	5.36
Total	56	100

As shown in the table, the respondents' longest years in service as school head is 11-20 years comprising 51.79% of the entire population. Most of them have served 11 to 20 years while very few have served for 21-30 years. In like manner, the study of Janer & Deri (2020) indicates that less than 50% of PES were being managed by mature leaders with mature leadership style. It can be deduced from the results that most of school heads in the second congressional district of SDO1 Pangasinan performed managerial and administrative functions for many years already.

. Table 5. Administrative Experience as School Heads

Position/Rank	Frequency	Percentage
Head Teacher III	5	8.93
Principal I	30	53.57
Principal II	21	37.5
Total	56	100

It reveals that most school heads occupy Principal I position at 653.57% while only 37.5% are Principal II and the remaining number is Head Teacher III position with 8.93%.

Table 6. School Head's Leadership Management Competencies Checklist

Competency Domain/Strand	Mean	DE
DOMAIN 1. SCHOOL LEADERSHIP		
Strand 1.A. Developing & Communicating Vision, Mission, Goals, and Objectives (VMGO)	3.22	P
Demonstrate co-ownership of and personal responses to identified issues consistent with the school's vision and mission	3.17	P
Involve internal and external stakeholders in formulating and achieving school vision, mission, goals and objectives	3.34	P
Align goals and objectives with the school vision and mission	3.38	P
Communicate the school VMGO clearly	3.01	P
Explain the school vision to the general public	2.56	P
Revisit and ensure that school activities are aligned with the school VMGO	2.76	P
Strand 1.B. Data-based Strategic Planning		
Establish E-BEIS/SIS and baseline data of all performance indicators	2.91	P
Involve all internal and external stakeholders in developing SIP/AIP	2.82	P
Utilize data, e.g, E-BEIS/SIS, SBM assessment, TSNA, and strategic planning in the development of SIP/AIP	2.69	P
Align the SIP/AIP with national, regional and local education policies and thrusts	3.21	P
Communicate effectively SIP/AIP to internal and external stakeholders	3.44	P
Strand 1.C. Problem-Solving		
Resolve problems at the school level	3.43	P
Assist teachers and students to understand problems and identify possible solutions	2.68	P
Analyze cause/s of problems critically and objectively	3.22	P
Address the causes of the problem rather than the symptoms	3.17	P
Explore several approaches in handling problems	3.34	P
Demonstrate a proactive approach to problem solving	3.38	P
Strand 1.D. Building High Performance Teams	3.01	
Involve stakeholders in meetings and deliberations for decision making	2.56	P
Set high expectations and challenging goals	2.76	P
Provide opportunities for growth and development of members as team players	2.99	P
Define roles and functions of each committee	2.91	P
Monitor and evaluate accomplishment of different committees/teams	2.82	P

Give feedback on the team's performance using performance – based assessment tool	2.69	P
Establish a system for rewards and benefits for teachers and staff	2.89	P
Strand 1.E. Coordinating with Others	2.07	1
Collaborate with concerned staff on the planning and implementation of programs and projects	2.52	P
Ensure proper allocation and utilization of resources (time, fiscal, human, IMS, etc.)	3.43	P

**Highly Proficient Proficient Basic** Below Basic

It is noteworthy that among the indicators, school heads put great efforts in implementing programs in the school that support the development of the learners. These programs according to some school heads are the celebration of Academic weeks like Science and Math weeks, Intramurals, Jamborettes, Foundation Day and other student-initiated activities that hone facilitation and academic skills of students. On the other hand, school heads were proficient on utilizing relevant research findings from reliable sources in facilitating data-driven and evidence-based innovations to improve school performance. Although described as intensively practiced, it substantiates the fact that school heads often times do not base their decisions and actions from research findings and worst not even indulge to reading or crafting educational researches.

The result suggests that school heads understand and implement laws, policies, guidelines, and issuances that relate to the management of human, financial, and material resources (PPSSH, page 9). The strand on financial management more particularly defined as SH manages finances adhering to policies, guidelines, and issuances in allocation, procurement, disbursement, and liquidation aligned with the school plan also received proficient indicator. It only proves that the respondents are well-versed in the implementation of RA 9184, otherwise known as the Procurement Law. The strand for school safety for disaster preparedness, mitigation and resiliency recorded proficiency level on the part of the school heads. It only meant that school heads need more training and exposure to activities that will help them work with the wider school community in managing school safety for disaster preparedness, mitigation and resiliency to ensure continuous delivery of instruction.

The most difficult role of school heads is giving technical assistance to teachers on subjects which you are not an expert. In particular, was on career awareness and opportunities. It can be deduced that, in general, school heads find it hard to integrate career awareness and opportunities in the provision of learning experiences aligned with the curriculum. On one hand, school heads regularly practiced their role in ensuring a learner-friendly, inclusive and healthy learning environment deduced that school heads constantly advocate for 21st century learning environment which accommodates the learning needs of every learner and support positive human interrelationships needed for effective learning to happen. The Basic Education Research Agenda (BESRA) stated that DepEd seeks to ensure that conducive teaching and learning environment is achieved by creating school environments focused on the needs of the learners and setting high social and academic expectations.

Table 7. Relationship between the School Leadership Competencies and the Profile of the School Head

Correlation Coefficient (r)	Age	Educational Preparation	Training	Years of Administrative Experience	Present Position/Rank
School Leadership	0.432	- 0.221	0.076	0.252	0.163
School Leadership	Positive Medium	Negative Low	Positive Low	Positive Low	Positive Low

Note: The sign of the correlation coefficient (+, -) defines the direction of the relationship, either positive or negative. A *positive correlation* coefficient means that as the value of one variable increases, the value of the other variable increases; or as one decreases the other decreases. A *negative correlation* coefficient indicates that as one variable increases, the other decreases, or vice-versa.

All of the independent variables except for educational preparation have a positive correlation coefficient with school leadership. However, except for age which has the highest correlation, they are all low. Having a low correlation coefficient implies a weak indication in determining whether the said variables results to a stronger/weaker school leadership. Moreover, 'training' was recorded as having the lowest correlation.

Table 8. Relationship between Instructional Leadership Competencies and the Profile of the School Heads

Correlation Coefficient (r)	Age	Educational Preparation	Training	Years of Administrative Experience	Present Position/Rank
Instructional	0 <mark>.342</mark>	0.070	- 0.269	0.769	0.525
Leadership	Positive Medium	Positive Low	Negative Low	Positive High	Positive Medium

The correlation coefficient of age, years of administrative experience, and position of the school heads specifies a strong positive relationship with the competency instructional leadership. Among them, the years of administrative experience attained the highest. Educational preparation, though considered to be positive, has the lowest correlation coefficient among the independent variables. Meanwhile, the 'training' was the only negative correlation coefficient noted.

Table 9. Relationship between Creating a Student-Centered Learning Climate and the Profile of the School Heads

Correlation Coefficient (r)	Age	Educational Preparation	Training	Years of Administrative Experience	Present Position/Rank
Creating a Student- Centered Learning Climate	- 0.398	0.051	- 0.331	0.252	0.163
	Negative Medium	Positive Low	Negative Medium	Positive Low	Positive Low

Only the age and training are considered to have a strong relationship with the competency 'Creating a Student-Centered Learning Climate'. However, both of them are negative in correlation. The other three independent variables are all positive low. The lowest among them is the educational preparation. On the other hand, the highest among the five was the age.

Little is the possibility to say that the higher educational preparation; greater numbers of training; longer years of administrative experience; or higher ranks the school heads have, the greater their skills in the said competency. However, it is discreetly inferred that the lower the age of the principal, the better his/her competency in creating a student-centered climate, or vice versa. The same conclusion can be made with training because of its negative correlation.

Table 10. Relationship between Human Resources Management and Professional Development and the Profile of the School Heads

Correlation Coefficient ®	Age	Educational Preparation	Training	Years of Administrative Experience	Present Position/Rank
Human Resources Management and	0.172	0.009	0.226	0.108	- 0.426
Professional Development	Positive Low	Positive Low	Positive Low	Positive Low	Negative Medium

The rank has the highest correlation coefficient among the five independent variables. However, it resulted to have a negative correlation. The rest are all positive low. The lowest among them is the educational preparation.

Table 11. Relationship between Parents' Involvement and Community Partnership and the Profile of the School Heads

Correlation Coefficient (r)	AGE	Educational Preparation	Training	Years of Administrative Experience	Present Position/Rank
Parents' Involvement and Community Partnership	0.225	0.074	- 0.142	0.440	- 0.101
	Positive Low	Positive Low	Negative Low	Positive Medium	Negative Low

All of the five independent variables, except for the years of administrative experience which has the highest correlation coefficient and is positive, are low. The educational preparation and rank, on the other hand, are negative in correlation.

The parents' involvement and community partnership competency of the school head with longer years of administrative experience is better as specified in the results. With the educational preparation, it shows a weak connection with the competency. Furthermore, because of their negative correlation, as the value of training and present position of the principal increases, their competency regards the parents' involvement and community partnership decreases. However, it must be emphasized that these two are also low in correlation.

Table 12. Relationship between School Management and Operations and the Profile of the School Heads

Correlation Coefficient (r)	Age	Educational Preparation	Training	Years of Administrative Experience	Present Position/Rank
School Management and Operations	0.432	- 0.221	0.076	0.252	0.163
	Positive Medium	Negative Low	Positive Low	Positive Low	Positive Low

Age, having the highest correlation coefficient, is the only variable with a strong indication of relationship with the aforementioned competency. Though training, years of administrative experience, and rank are positive, they are all low. Moreover, the educational preparation has the only negative correlation coefficient. It is also low. Nonetheless, the lowest correlation coefficient is the training.

Table 13. Relationship between Personal and Professional Attributes and Interpersonal Effectiveness and the Profile of the School Heads

Correlation Coefficient (r)	Age	Educational Preparation	Training	Years of Administrative Experience	Present Position/Rank
Personal and Professional	- 0.225	- 0.255	- 0.382	0.206	0.163
Attributes and Interpersonal Effectiveness	Negative Low	Negative Low	Negative Medium	Positive Low	Positive Low

Only two variables were positively correlated (years of administrative experience and present position) to the dependent variables. But all of them have a low correlation coefficient except for training. Training have the highest correlation coefficient among them. The lowest is the rank.

It can be inferred that the higher experience and position you occupied, the higher quality of your personal and professional attributes. However, this kind of prediction has a low possibility. With regards the training, ages, and educational preparation, as

their value decreases, the value of the competency increases, or vice versa. Especially with training, it has a moderate correlation that shows a high possibility of the value of competency to be concluded.

## Recommendations

- 1. Promotion and/or designation to school head position should require enough experience needed to run a school. Time element is crucial
- 2. School heads need to pursue graduate studies.
- 3. School heads must pass the National Qualifying Examination for School Heads to qualify for a Principal position.
- 4. The proposed leadership enhancement program may be implemented by the school heads to advance to career stage 3 or 4. 5. Further study on the Philippine Professional Standards for Supervisors may be conducted
- 5. The Graduate Schools as an institute that produced and developed future educational leaders should offer in their curriculum for MA / Ph.D. in Educational Management, a subject or unit that is aligned on the domains of NCBSH to better and prepare the candidate for principalship work.
- 6. The Department of Education and other private training institutions should design and provide leadership and management training for the principals that cater the skills and competencies related to the domains of NCBSH for them to be improved and enhanced in the area of educational management and administration.
- A propose Capacity Development Program for School Heads should be introduced in every school divisions that is anchored on the Seven Domains of National Competency Based Standards for School Heads. The Capacity Development Program involves four stages that enhance the leadership and management competencies of every principal in school based management. First there should be a Principal Induction Program, a modular lesson for the seven domains of NCBSH. A total of seven modules will be studied by the principals in a Seven Weeks Course duration. Each module requires a one week training to be facilitated by the Human Resources Department of the Division Office; and at the end of the training, each school head is expected to submit three project proposal based on the identified problem as per domain of the NCBSH. The learned competencies on leadership and management should be utilized to remedy or solved the given problem for the period of two (2) to eight (8)months. Once, the problems have been solved, the principals will receive a certificate of completion and have the chance to progress in the next stage which is the assessment and validation. The Second stage is the Assessment and Validation, a validation of school heads work will be conducted by the Division Office in a form of written assessment and actual on the job simulation based on the seven domains of NCBSH to validate whether the principals have mastered the learned competencies and utilized it for the school development. The assessment and validation will be lasted for period of one week to a month depending on the actual performance of the principals whether he/she exhibited the learned competencies and significantly contribute for the improvement of school performance whether it is school leadership, instructional leadership, HRD etc. The Third Stage, is the Community Immersion – it is a One Week Community Immersion which is planned and coordinated with NEAP-Regional Office. The community immersion aims to develop the personality and attitude of school heads to become servant and transformational leader and at the end of the immersion school heads should be able to write twenty (20) pages of learning experiences regarding their reflections, struggles, success and happiness of becoming the school head. And, lastly, to synthesize all the learning experiences accumulated by the school head, a final interview will be conducted by the Regional Office to assess the readiness level of the school head to think strategically and globally in developing possible solutions regarding issues and problems of the school system and the organization itself. Once the school head completed this Capacity Development Program, he/she will be conferred for Master of Principalship, which is similar to the CESO. All principals whether he/she is new and old in the service should be able to undergone in this program.
