

Short-Poems, Part-2

(Poet-Mohan Basnet, Gauhati University, Guwahati-781014 Assam India)

(1)

Are black holes the creators of all existences ?

Black holes are undoubtedly the creators of all existences.
Celestial bodies other than black holes in each Galaxy gradually die.
And small black holes are created in the area where the Galaxy is located.
All the Celestial Bodies of a Galaxy at a Time,
except the black holes,
doesn't die.

And in that area only small,
Black holes start to form Supermassive Black Holes.
And after some long time Galaxy is created in that area.
Within this Galaxy there're all the existences of the universe.
So that, black holes are the creators of all existences.

(2)

India

Another name of India is Bharat.
India or Bharat is a republic country covering a vast territory.
It is the seventh largest country in the world by area.
This country was formerly under the British,
on August 15, 1947,
it leaves from the hands of the British,
and becomes independent.
The head of this nation is called the President.
And the head of the government is called the Prime Minister.
There are some states in this nation,
and there are some Union Territories.

This nation is inhabited by people who speak many languages.
The national language of this country is Hindi.

English should also be studied in schools by the people of this nation.

Papers written in English are also accepted in the offices,
in this nation.

India or Bharat is located in South Asia.

To its south is the Indian Ocean,

Arabian Sea to the southwest,

to the southeast lies the Bay of Bengal.

To its west lies Pakistan.

To the north are China, Nepal, and Bhutan.

To the east lies the country of Bengal,
and Myanmar.

Currently,

this country ranks first in the world in terms of population.

This nation is a secular nation.

India is a nuclear weapon country.

The space missions conducted by this country have been able to gain worldwide appreciation.

Forests cover 21.7% of the country's area.

(3)
Brothers

Usually,

brothers,

they love each other.

They help each other in difficult situations.

Happiness also existence each other.

When problems arise in their life,

then,

at this time,

even if there are big problems, they will fight as one.

They grieve together in sorrow,

they become happy together even in happiness.

But in Mahabharata, there is a fierce fight between brothers.

And in the Ramayana,

the sacrifice of brother for brother provides a higher ideal for human society.

In the Ramayana,

we find an example of Bharata making great sacrifices even though Rama was his stepmother's son.

He did not take charge of the state.

(4)

My thoughts about God

I think that God does not exist in the universe,
according to scientists,
there are only energies in the universe.
This is the thinking of science,
but according to Religions there is God.
There is more differences between religion and science.

The principles of the Religions are not often tested,
hence there is no change in these policies,
but the policies of the sciences,
are tested again and again,
if these policies go wrong,
those will be changed.
Therefore,
rather than human society adopting religious policies,
I think that,
it is reasonable to adopt scientific principles.

(5)

Days after the breakup

Nowadays,
there is no happiness in my heart.
I think that it was writing by unknown Power !!
I really loved someone.
And she also loved me from her heart.
But suddenly,
it happened in the relationship between the two of us ;
The consequences of which I am experiencing today,
and maybe she is suffering too.
Maybe,
such a painful separation will never happen between us,
both of us must have thought ;
But happened !!

Of course,
one of the two is at fault.
I have no fault in this.
It was her fault.
After all,
it was not supposed to happen !!
Now after this ?
I think that now after this she will go back to the old place and so I will !!

Staying in our respective places, now both of us will take the pain of the breakup of the life-journey in our hearts and bring the new suffering life-journey forward.

This breakup will haunt both of us for the rest of our lives.

I think that it was written in her life by an invisible force,
just like mine.

To be one between us was not written,
and how could we make it successful when we two human beings tried each other,
right ?

I don't want to resume this relationship anymore.

Whatever happened,
happened.

I am ready to live in agony.

She probably doesn't want to either.

She is also ready to suffer like me!!

She is a great woman with stronger endurance.

And she can endure.

I feel that,

I have developed some endurance qualities by emulating her,
Maybe bearable.

I started writing poetry after getting inspiration from you.

When we had a good relationship ;

Now we are divorced,
never again,
unable to connect.

Even now I am inspired by you ;

Perhaps even more so than in the case of no divorce.

Even though we broke up,

You aren't separated from my heart.

My heart misses you forever.

After breaking up with his girlfriend, with the inspiration he got,
examples of reaching the highest peaks of success abound in the history of human society.

One such example is,

Emperor of Voice Narayan Gopal.

I would like to mention a little information about Swara Samrat (Emperor of Voice) Narayan Gopal below ;

Narayan Gopal was a Nepali singer and composer.

Guruvacharya.

He often used to sing modern and patriotic songs and used to compose music for those songs. He was a famous singer of Nepal.

His full name was Narayan Gopal

He often used to sing modern and patriotic songs and used to compose

He studied music from Baroda, India.

He has lent his voice in many popular Nepali language movies including Swargaki Rani,

Yo Samjhini Man Chha, Ma Ta Laliguraans Bhaichhu.

Heartache.

Your memories keep coming.

I never wanted to be separated from you.

but broke up,

our relationship !!

now again,

there is no hope of becomes one ;

The relationship between us is broken,

never to be reunited.

Its your fault for the divorce between us.

Maybe you didn't even think that your behavior towards me could cause such a big heartbreaking event to happen

!!!!

Because of your love,

the person who has been coming and going for so many times,

with you,

again and again,

maybe you never thought that he can refuse to connect !

Perhaps if you had thought about these things,

you would not have behaved like that towards me ;

Because you didn't want to live separated from me.

This is why,

I have been telling you time and time again,

what if you become comfortable, you do not agree !!

This is all writing,

which could not be erased ;

was to be,

between the two of us ;

Just left !!!!

All your behaviors were intolerable;

That's why,

I was compelled to go and come ;

But your love was so much that I endured even the unbearable behavior you did towards me.

Been with you for a long time,

but couldn't stay till the end,

because your behaviors were going to increase,

harder to harder,

day by day towards me,

which I could not bear ;

Finally,

even though you only made out with me online,

I used to stay with you.

Think to yourself :

You even blocked my phone, rejected my Facebook requests, and distanced yourself from communicating with me on Messenger.

Finally,

you did not even become online.

In such a situation,

how could I be in a relationship with you forever ??

think :

Whether or not it was your fault :

Well,

You don't have to think about it anymore.

and also think,

for the satisfaction of the mind.

We are two human beings separated,
from our relationship,
but my heart is not broken from your love,
maybe never.

Maybe the same situation would have happened to you !!

My heart misses you now.

I loved you to the core of my heart.

I never thought that we would break up someday.

Maybe you didn't think so either.

I rejoiced at the thought that I would spend my life with you with unbounded happiness ;

And had envisioned to spend every moment of these happiness.

Maybe you thought like me !!

Everything is incomplete.

You still loves me !

How not to do it ?

Even though,

I broke up with you,

my heart is still loving you.

The proof that you still love me is a story I shared on my Facebook, where you like even after I broke up with you forever.

Of course I reacted too.

Thank you.

Expressed gratitude.

This is how the days after divorce between us are going on !!

Both of us have been disturbed by this separation !!

Well,

now there will never be a meeting between the two of us,

but both of our hearts are still aching.

I think that since my invention Element Therapy can immortalize humans and the solar system,
even though we are separated,
we will remember each other for ever.

Because between the two of us, the love that cannot be forgotten is born in the hearts of both of us.

That's why even today our two hearts are worried about each other.

And such preoccupation will remain between these two hearts of ours throughout eternity.

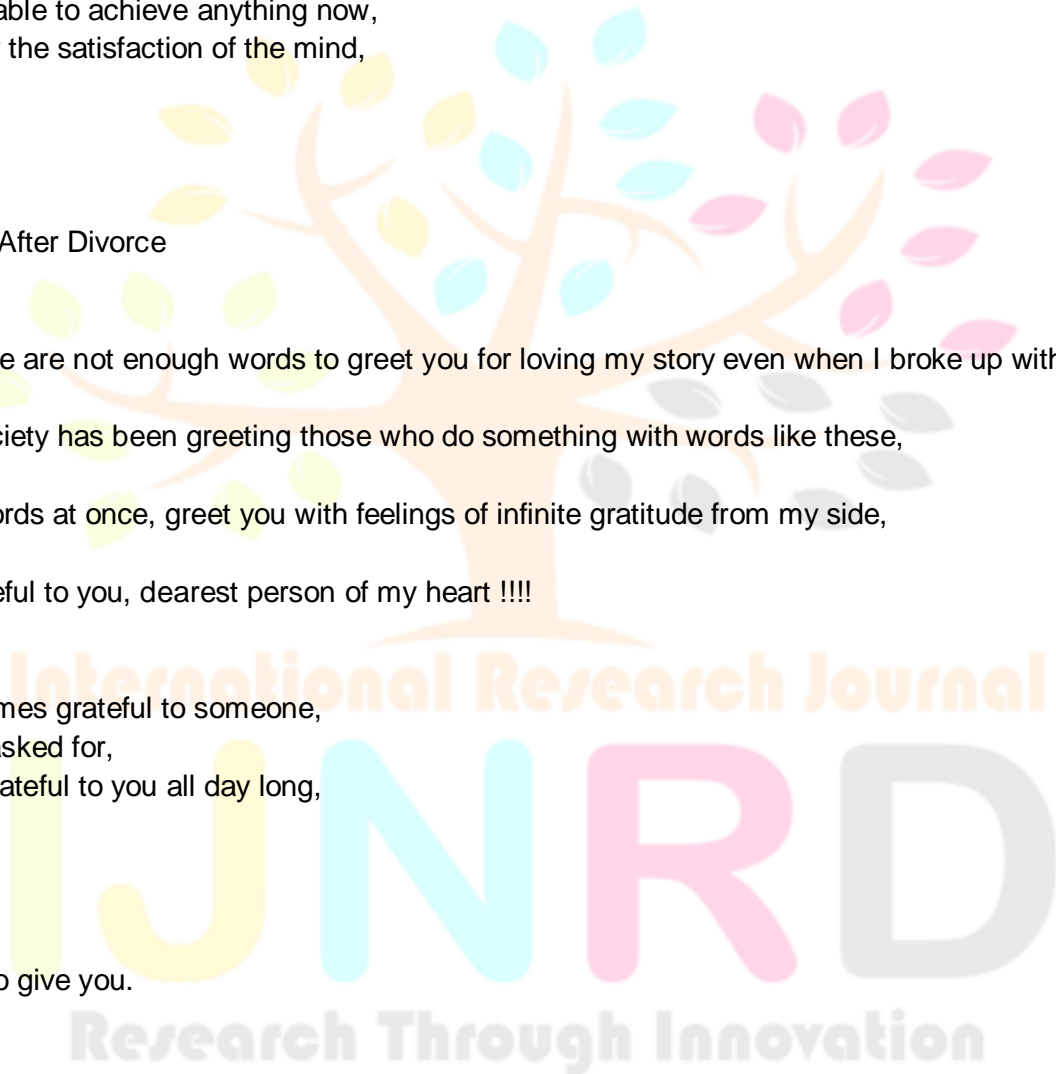

After all we have each other,
when we used to love each other so that we could not forget one day,
why did you hurt my brain to go away from you ??
Why don't you accept anything I say ????
Why did you make yourself offline??????
Why did you break all the requests I asked you to come online ???????
think,
My dearest !!
yes,
by remembering on the past in this way,
we two will not be able to achieve anything now,
and even if it is for the satisfaction of the mind,
think !!!!

(6)

Gratitude to Lover After Divorce

My dear darling,
Thank and gratitude are not enough words to greet you for loving my story even when I broke up with you,
My dear darling !!
At least human society has been greeting those who do something with words like these,
and I too,
using these two words at once, greet you with feelings of infinite gratitude from my side,
my dear darling,
I am eternally grateful to you, dearest person of my heart !!!!

When a man becomes grateful to someone,
anything can be asked for,
and I have been grateful to you all day long,
demand me,
dear,
the things I have,
my love,
I won't be greedy to give you.
Demand !!!!
But my dear,
don't demand the things,
I have abandoned !!
You will never get these things from me again.
like,
the broken relationship between us,
now,
dear,
this is not possible !!
burst !!
no longer connected.

Your behaviors made me like you,
harsh,
Harder than stone !!!!

(7)

Now your memories are coming

After all,
my heart holds you forever inside, with love and respect.
And no matter how many things you do that I can't stand,
because of this I can become distant from you,
and even if it becomes,
but the heart ?
My brain is also related to me,
it can think,
it can decide what is right and what is not right,
because of this decision I became separated from you.

But my heart and my brain are not the same thing.
The heart cannot think.
Only it can like,
and love.
The heart can never be far away from the person it likes and loves, my dearest !!
I didn't love you,
my heart did.
You should have understood my heart !!
Even if you don't understand me.
I didn't love you,
therefore you misbehaved me,
and I also fled ;
It is not your fault,
because I didn't love you.
But my heart ??
It is loving you.

To understand my heart you had to either establish a "platonic-heart-relationship" between your heart and mine ;
Either you should have made my heart the best friend of your heart ;
Even if you did not make my heart the best friend of your heart,
even if you made my heart the common friend of your heart,
my heart would not cry.
But hang me,
hang my heart that loves you too !!
You would have done this job well,
my dearest !!
My heart will remember you forever,
looking for you,
since not seeing,
will cry.

Since someone thinks bad of you, my heart will also be sad and cry.

What can be done and many more, without suffering,

this heart without arms and legs.

You had broken its arms and legs by your misbehaves !!

(8)

After refusing even when more requested

I have requested much of you,

but you didn't show any signs of listening.

What should I do now ?

Tell yourself !!

When you don't give me any answer,

how can I leave you in love?

Tell me yourself !!!!

There is no such behavior in human society !!!!

What do I understand from your behavior ?

I am tired of making the same request to you again and again.

But you didn't care !!

Why did you do this to me ????

After all,

I was the one who loved you.

I am compelled to do the same as you.

I will never come back after that.

You will only regret,

It will be my mark on your life.

Now my other journey has started;

I'm trying to forget you.

I was happy before when you were with me.

Now I'm suffering when you left me.

Now even if after this you realize your mistakes and offer to join me again,

I will refuse.

Because your inhuman behavior has left an indelible imprint of pain on my brain.

Now this pain will always be a sign of the love I gave you as a gift.

And this mark will haunt me forever.

You understand my love.

You could have chosen one of many relationships with me ;

I prepared these relationships myself.

And told you.

I didn't want to be apart of you.

Always wanted to be related ;

But you didn't understand.

And I will never come back again.

However,
I am sad now,
due to the situation of losing a person whom my heart loved and whose heart gave birth to a love that will never be forgotten.
And I think this situation will remain forever.
I didn't want to lose you,
but after you took such a doctrine, I had to stay away from you even if I didn't want to.
I was thinking of getting into a relationship with you,
but you didn't like any of the relationships that I put forward,
you just wanted to not have any kind of relationship with me.
That's why I had to be compelled to stay as you want.
You should not take this doctrine as the right doctrine,
neither I can be happy nor you can be happy with this doctrine you have taken !!
There is no way to make amends now,
because your wrong behavior has left an indelible pain in my brain.

Now both must suffer forever,
both should repent !!
Apart from this,
there is no other option between the two of us !!!!
It is said that "the writing cannot be erased" like "death",
it is said to be "written",
by some unknown force,
and it remains,
but after some time "death" can be erased by "medical science" ;

But if "everything is written" by an unknown force,
even science cannot "erase or prevent it from happening",
for example,
suicidal people know that science can revive a dead person again,
and science can revive a dead person when a dead body is found. If people with this kind of thinking can die without finding dead bodies,
like drowning in the ocean,
etc., etc.
And the way my brain hurts today, what science can cure it ?
Such things are said to be "written and not erased" ;
It just happens,
and this is what happened between us today,
because some unknown power had written it in our lives !!
It doesn't really fade away ;
Even science can never prevent such incidents.

I got inspiration from you and started writing and composing epics related to literature.
And wanted to operate in the same way for an infinite time period,
if my invention Element Therapy could immortalize humans and the solar system within our lifetime.
But be together for some time in the beginning,
and now you have left me alone,

on such a difficult literary journey !!

I will be successful even if your companionship doesn't remain with me.

But it will be difficult.

It would have been easier if you had supported me.

All these are your creations,

if you were not there,

these epics would not have been created,

and in time if these works become worthy of receiving the Nobel Prize, half of the money from the Nobel Prize will be yours.

Of course,

these epics get the Nobel Prize.

I have full faith,

because these have become masterpieces.

And they have been published in English,

and the number will be large,

by the time they get the Nobel Prize.

I have given you many options to choose from ;

These options were as follows :

Platonic love affair, ;

Best Friends Relationship, ;

Common friend relationship, ;

Facebook Friends Relationship, ;

And,

related only to the epics ;

But you didn't like any of these relationships,

just preferred not to have any kind of relationship with me.

(9)

The connection between the heart and the brain in the realm of love

Of course dear,

There is a difference between my "heart" and "Me".

I am a man with a brain,

The brain of people works to distinguish between what is right and what is not right.

but,

my dear,

the heart has no brain.

It cannot think,

only this can feel,

sorrow,

pain,

cheers,

love,

such feelings are related to heart.

The feeling of heart is different,
if it likes someone,
never forgets.
And when it likes a person,
it likes and loves so much that,
it cannot forget itself.
My heart loved and adored you,
It loves you even now !!
It will never forget you,
my sweet darling !!!!

You betrayed my heart,
my dear darling,
now it's crying,
remembering the betrayal you gave !!
The eyes are connected to the heart,
dear,
when the heart hurts,
tears flow from the eyes.

(10)

Do lovers find inspiration even after a breakup ?

When there is a good relationship in love,
each other gets inspiration from each other,
to perform an action successfully.
When it breakups,
they get more inspiration than good relationship in love,
to perform an action successfully,
by each other,
to bring an action to a successful peak.

Is there any example in history where love is still inspired after a breakup ?
Yes there is,
Do you have a few comments about this ?
I will definitely :
tell us.

One such example is Emperor of Voice Narayan Gopal.
This person managed to become a vocal emperor after a love breakup.
Because of the motivation received from lovers.

Here is a brief summary of Emperor of Voice Narayan Gopal :

Narayan Gopal was a Nepali singer and composer.
Guruvacharya.

His full name was Narayan Gopal
He often used to sing modern and patriotic songs and used to compose
music for those songs. He was a famous singer of Nepal. He studied music from Baroda, India.

He gave his voice in many famous Nepali language movies including Ma Ta Laliguraan Bhaichu, the queen of heaven, yo samjhine man chha.

(11)

Human female race

In Hinduism,
to the female human race,
considered as Lakshmi.
Female human beings,
some are known as Daughter,
some are known as daughter-in-law,
some are known as sisters,
some are known as niece,
some are known as Girlfriends,
some are known as Mother,
some are known as grandmothers,
etc.,
etc.

History says that,
the female human race,
many tortures,
have experienced from men,
sometimes,
from men,
females,
even those who lost their lives.

In a patriarchal society,
female human beings,
go in the houses of men,
by becoming their wives,
in a matrilineal society,
the people of the female human race,
bring the men,
by making their own husbands,
to their houses.
Human society has thus customs regarding marriage.

To women,
by males,
even in the fields of education studies,
regarding discriminating evidence,
History also speaks,
but today it is not like that.
Women today,

together with men,
in the fields of education,
equal to men,
can be advanced.

Women are creators,
they give birth to new people,
and to those new people,
together with parents,
raise,
educate,
they make them stand on their own feet.

History says that,
even in the fields of labour,
to women,
than men,
low wages were paid.
but now it is not like that.

History says that,
related to works of major responsibilities,
Females,
can't do according to men,
in such works,
the female race,
cannot be engaged,
but today,
all these are lost.
In today's era,
females,
in the countries operational areas,
the first to take charge,
reached the chair.

(12)

The creation of the Earth

A planet,
is born,
in the Universe,
which have a closed relationship,
with our solar system.
Later scientists,
named of this planet,
as Earth.
This planet is born,

when the present we know,
as our solar system,
took place of it's birth.

The birth of our solar system,
happened,
by the womb of supermassive black hole named Sagittarius A.
When the solar system evolved,
by the womb of supermassive black hole named Sagittarius A,
at the sametime,
all the planets,
and all their satellites also,
took birth from the womb of this black hole.

And earthly creatures' ancestors,
of different species',
also took birth
from the womb of that
supermassive black hole named Sagittarius A.
And,
the Earth's oceans also took birth from the womb of this Sagittarius A.

When these oceans developed,
in the womb of,
named Sagittarius A,
at that time
perhaps,
the quality of these oceans of flowing
may not have received,
and,
the essential foods for various living-organisms of different species',
ancestors also,
might be received by the black hole
named Sagittarius A,
as of human women's unborn infants would have received foods that they need
from their own mothers.

When our solar system is born
all the planets and all these planets' all satellites
born together,
and,
after birth,
all these planets
circling the sun.
And,
all the oceans of the Earth,
started to flow,

and,
the various living-organisms'
the different species'
ancestors
also began to take foods they needed from the Earth.

(13)
Mistake

All the people make mistakes,
there is no human without mistakes,
from infancy,
to elderly,
all men make mistakes.
From ordinary people
to even scholars of the highest order,
they also make mistakes ;
But most importantly,
admit the mistakes.

But in human society
all people
do not accept
their mistake
as long as these people live.
But other people
even their common mistakes
accept
and correct.

Who admit their mistake
easily,
and accept it,
as wrong,
such people
are considered
as the people of progressive thinking.
The people who will not correct their mistake
even as long as they live
such kinds of people is considered
as the people with stereotyped thinking.
And I always belong to those people
who admit their mistake
and
correct that.

(14)

Importance of water to humans

The importance of water to humans is immeasurable.
 Humans cannot survive without water.
 Since dawn,
 water and humans have been associated
 each other
 and this process continues until bedtime again.
 Of course people need water,
 for the whole twenty four hours.

From washing mouth in the morning
 water is needed even for bathing
 to the people
 even washing clothes
 need water
 to the people.
 On the other hand,
 the kitchen
 can't run without water.
 Before cooking the rice
 to the person responsible for cooking rice
 first of all
 water is needed to wash the rice.
 Now people need water
 to the kitchen works
 until it is finished.

After cooking
 also people need water to take foods
 because before taking food
 the dishes need to be washed
 some are even drink water while they take foods.
 Now after eating,
 people need water to wash dishes.

Even to save the animals and birds of the people,
 they need water.
 Also in agricultural activities
 people need water.
 The lights we lit in the houses were also produced from water
 what we call electricity.
 And these electrically operated machines
 which we use to perform our daily essential tasks
 none of these if there was not enough water on earth
 it was not possible for the people to bring these things into people's daily works.
 Similarly,

many other acts to complete successfully
water requires
to humans.

(15)

Application of knowledge to humans

Humans today have all their needs
although not able to complete
humans have many of these needs
completed,
for example,
like,
today humans have their own dwellings
which were not in the early days.
These houses protect humans from sun and water,
can provide security.
Also,
humans of today's age
have become capable to avoid coldness
by the use of cloths.

And humans of today's era
can avoid heat too by the use of fans.
Humans of today
have been freed from many kinds of diseases
due to advanced medical systems.
There is no sorrow
of present era's humans
like the humans of the old age
in all things
like,
if people have to go somewhere far today
no need to walk,
as humans of earlier ages,
because
there are
trains,
pea-carts,
even airplanes.

Humans of today have become able to easily
to reach,
including trips to nearby locations
by the use of
like,
motorcycle,
e-rickshaws,

etc.

In the earlier ages people were also uncertain about the food they needed.

But the human beings of today's age do not lack it,
because such materials
humans have been able to produce
with commercial goals.

In the old age

to turn raw rice into prepared rice

there were not mills

but today's people can turn the raw rice
into the prepared rice
from the mills.

Even though the humans of today's age have reduced physical exertion
and

have been able to live in an advanced manner

because

in today's era

the work done by humans

done by machines

for example,

like,

humans today do not need to plough

because these works

are carried out by tectors.

Today's humans in every field

have been able to perform tasks

by the use of machines.

The invention of the Internet has made the world like a room in a house today.

Today,

humans have all kinds of discussions

small and large

by the use of

Video Conferences

and also become able

to be done from home.

Due to the development of advanced computers and mobiles

humans in today's age need any documents

have been able to obtain at once

from anywhere on earth.

In this way,

the humans of today's era have been able to complete many other tasks with the use of machines.

Thus,

humans of today's era

have been able to use to meet their needs using modern science and technology.

(16)

Feelings of immense happiness

Today our daughter Miss. Shikha Basnet
has completed her
APSC Examination (2024)
successfully.

She is daughter of
Mr. Ratna Basnet
and
Mrs. Champa Basnet.
She is the elder daughter of
this couple.

Her house address is as follows :
Village - Baligaon
P. O. - Buroighat
District - Bishwanath
Province - Assam and
The country is India.

My family all members including me
have felt unbounded joy at her successful result.
We all have conveyed her
our
heartfelt
Congratulations
and
expressing
our best wishes
to operate
the upcoming Govt
Actions
successfully.

(17)

What can happen inside a Supermassive Black Hole ?

Supermassive Black Holes are the
creators of all existence in the universe.
They create at a time
in some numbers of
stars,
planets,
satellites,
Asteroids,
Comets.
And
when the entire Milky Way Galaxy
was created

by a member of these
Supermassive Black Holes
named Sagittarius A which we can
see at present at the Center
of Milky Way Galaxy
at the same time
what we see on earth today
the different types of
living-organisms
of different species'
ancestors were also created
in the Earth.

The creations of all these
by these Supermassive Black Holes,
how could they have done it ?
When a star was created
by a Supermassive Black Hole
at the same time
it also creates
planets,
satellites
of all these planets,
comets,
asteroids.
And Sagittarius A,
created
the Milky Way Galaxy
and
all kinds of creatures'
ancestors,
what we see today
in the Earth.

How do the Supermassive Black Holes create the Galaxies ?
First of all these Supermassive Black Holes
were created
by many small black holes becoming united
in the forms
of all kinds of Fundamental Particles of Energy
for doing the creations of the Galaxies.
It means,
the Supermassive Black Holes
were created by united small black holes
in the forms of
all kinds of Fundamental Particles of Energy.

Now the works of Supermassive Black Holes will be
the creations of
stars,
planets,
satellites of
all these planets,
asteroids,
comets of a particular Galaxy.

The Supermassive Black Hole named Sagittarius A
which is a member of the large number of
Supermassive Black Holes,
and now we get to see at the Center of Milky Way Galaxy
has created the Milky Way Galaxy
and the ancestors of
living-organisms'
different species' ancestors
of the Earth.

How did the Supermassive Black Holes perform the work of creation?

First of all in the Supermassive Black Hole
different types of energy
which are related to Fundamental Particles of Energy
will be combined to form
Quarks.

Supermassive Black Hole creates Quarks by using some energy that are related to Positive Charge
and other some energy that are related to Negative Charge.

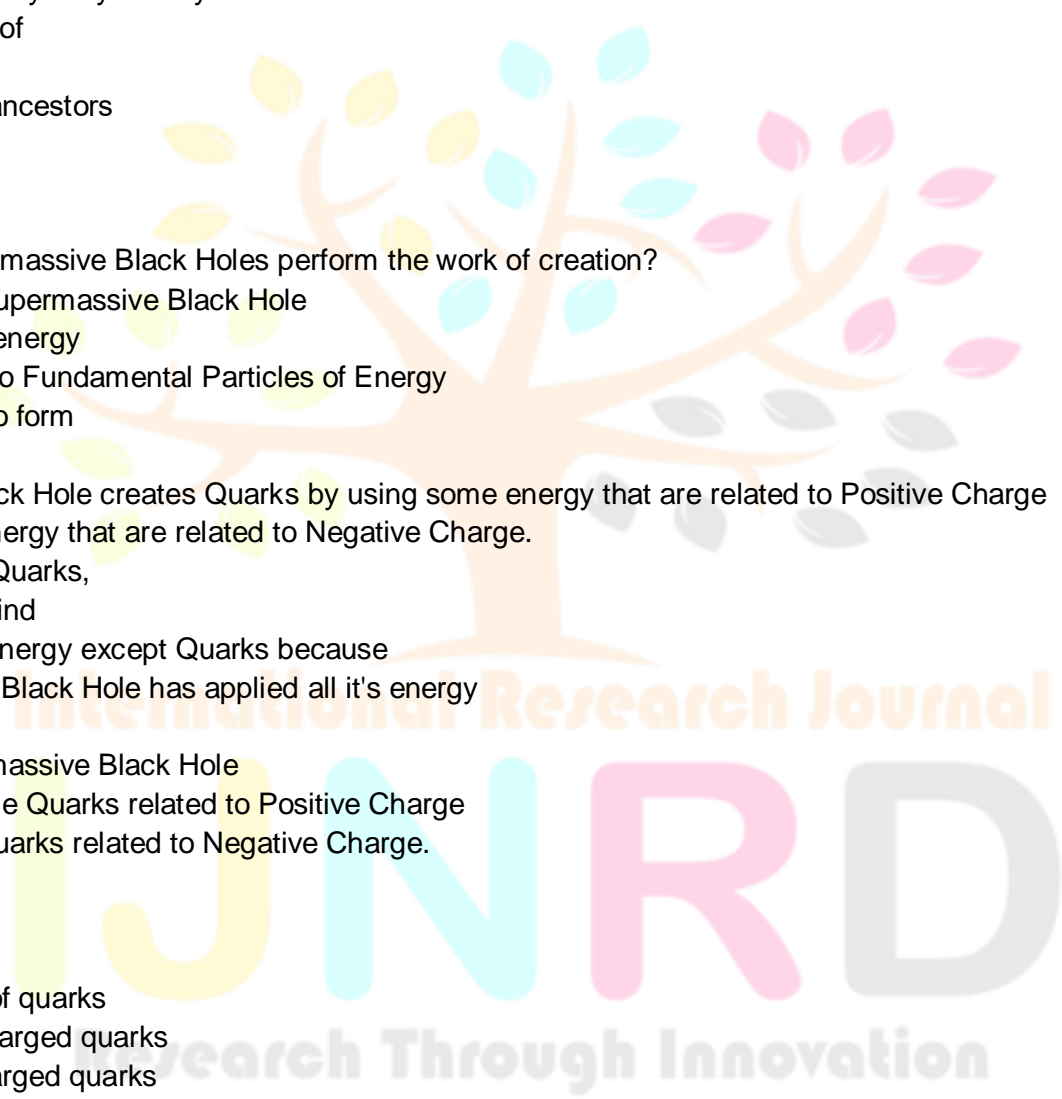

After creations of Quarks,
perhaps we don't find
other particles of energy except Quarks because
the Supermassive Black Hole has applied all its energy
to form Quarks.

Now in the Supermassive Black Hole
there are only some Quarks related to Positive Charge
and other some Quarks related to Negative Charge.

Now after this,
after the creation of quarks
these positively charged quarks
and negatively charged quarks
will combine by a special process
to create

Protons and Neutrons.

Again,
Protons,
neutrons,
and Electrons,
especially together,
to create various elements'
atoms.

International Research Journal
IJNRD
Research Through Innovation

Now of these various elements'
Atoms
especially together
to create
different types of molecules.
And from these molecules
Supermassive Black Holes
create entire the universe.

These functions are performed specifically,
What is this special form ?
The Supermassive Black Holes are the celestial bodies that occupy a vast areas in the Universe.
The Galaxies are formed by the Supermassive Black Holes at the particular areas where the Galaxies were located before.
And the Galaxies are formed by many many solar systems.
When the Supermassive Black Hole will form a Galaxy
at that time
it will form a particular Galaxy on the basis of it's previous models.
It means
how much there were the solar systems in a Galaxy,
as same and as same numbers will be created the solar systems in a Galaxy by a Supermassive Black Hole.
I have what mentioned above as special form,
it is that special form.

Now the Supermassive Black Hole named Sagittarius A also creates the Milky Way Galaxy,
but when it created our solar system
at that time,
it creates Earth with what here we see today,
the various living-organisms'
different species'
ancestors also.
And the oceans of the earth
were also created.
But the Oceans in the Sagittarius A
perhaps didn't flow
how they are flowing at present in the Earth.
The various creatures' ancestors of different species
perhaps got their essential foods
from this Supermassive Black Hole which is named as Sagittarius A.
Because the human women
when their unborn children
need food
at that time
these children
we have already today understood that
received food
from their own mothers.

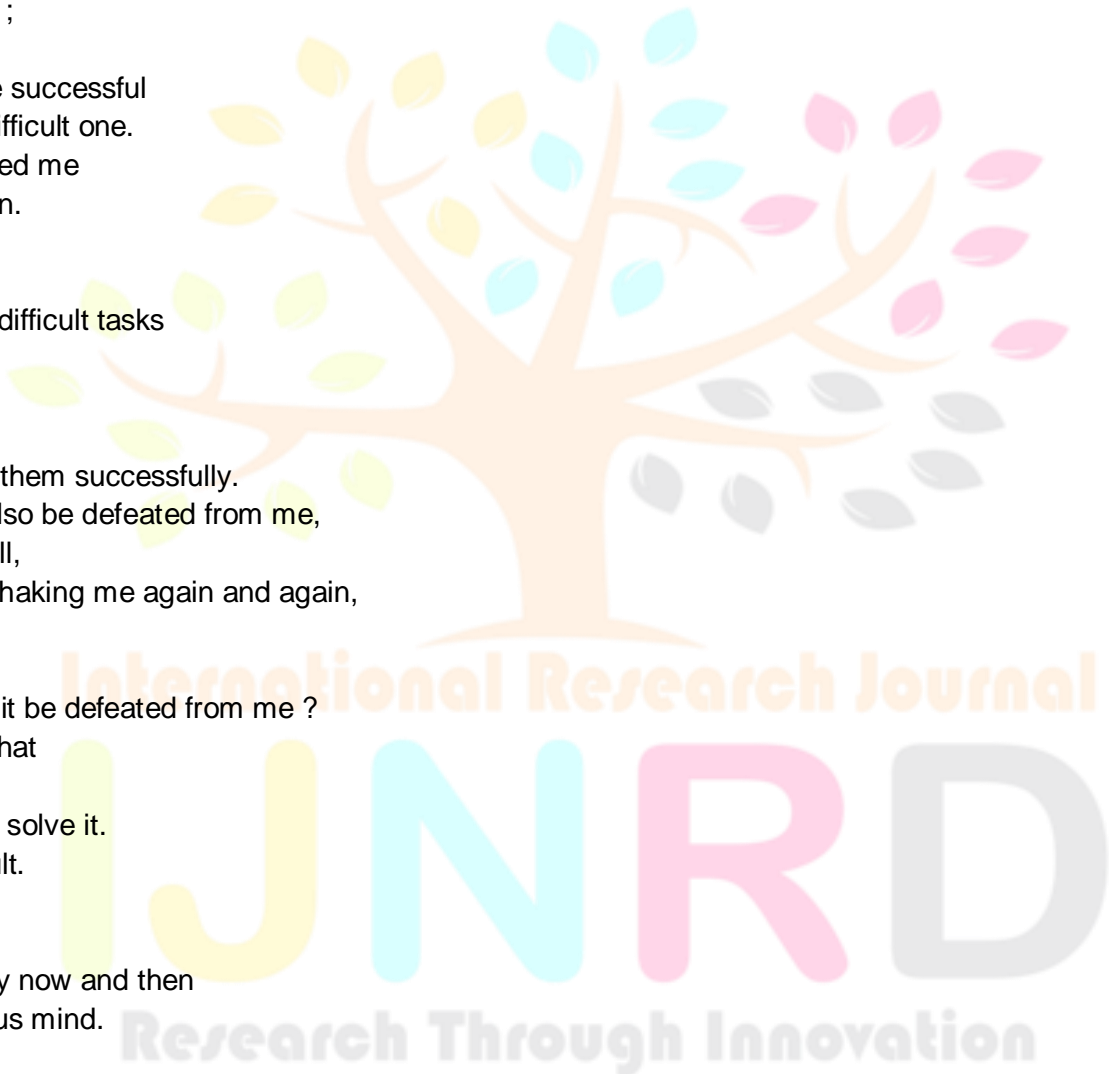

(18)

Not just fear, but the emperor of fear

Not just Fear,
but the Emperor of Fear
shakes me.
Cause of this fear is
an act
related to uncertainty.
And this is also related to
a difficult task,
Well,
there is a solution to this,
but it is difficult ;
I know that,
this task will be successful
but it is most difficult one.
But it has shaken me
again and again.

Such kinds of difficult tasks
in my life
many came
and,
I had defeated them successfully.
This task will also be defeated from me,
I know very well,
but had been shaking me again and again,
and,
I think !
Whether won't it be defeated from me ?
But I am sure that
I take it easy
I will be able to solve it.
But it's a difficult.

It shakes every now and then
to my conscious mind.
Sometimes it's
also awakening me from sleep.
And again
try to be normal,
and yes,
I will be normal,
but this memory reminds me,
again and again.
And
it is also shaking me too.
When this fear,

touches my heart,
I feel that
my breathing is stopped.
The whole body trembles.
And
I try to make understanding to my heart
remembering it
that
many of these types of difficult tasks of past
that I have achieved successfully.
When I remind it
unforgettable memories of the past,
then in a moment,
my heart becomes calm.

(19)

My favorite place

My favorite place is
my birthplace.
It is called
birth place is
more fun than heaven.
Really me
my birthplace
if there is a heaven
and the heaven we've been hearing about
fun atmosphere
even if true
this is my birthplace
more than the joys of heaven.

My birthplace is
in this Earth
located in the continent of Asia's
a great nation
of India
of Assam Province
Under Bishwanath District
of Helem Mouza
at Takoubari Village Panchayat
to the ward
which name is
Baligaon.
My birth happened in this village.
Presently Baligaon is under
Misamari Gaonpanchayat

To the west of this village
about two kilometers away
is situated
Buroi River.
When I was little
I used to go to play fishhook in this river.
When playing
it was very fun to me.
In the north direction of this village
there're situated
Railways and
a national highway.
In the east direction
there is another ward of Tokoubari Village Panchayat
that's ward name is Fatiyabari Village.
In this village there are
People of Missing Sect.
And these people are great
friendly.
To the south of Baligaon is situated
Arivhanga village.
Also from Baligaon
about five kilometers to the south there is the Brahmaputra river.

The People of India and Assam where Baligaon is located
are very friendly.
As in India there are people of different sects who speak many different languages
similarly,
in the province of Assam,
the people of different sects also
speak different languages.
I belong to the Gorkha Community,
and my mother tongue is also Gorkhali language.
The nation of India from a natural point of view
very rich.
And also from the point of view of natural beauty,
it is also very beautiful.
Assam province also from the natural point of view is
very beautiful.

(20)

Deforestation

Today,
forests are being destroyed.
The main reasons for these are :
Overpopulation and urbanization.
As the numbers of people increase

they need more land to build their houses
and also they need more land for
agricultural work.
So that they destroy forests.
Also due to urbanization
forests have been destroyed.

There are other reasons as well for
deforestation,
such as paper mills,
these mills need more woods
with a view to produce papers.
And these trees
to paper manufacturers
available from the forest.
Even from natural forest fires
forests are being destroyed.
There are other many reasons related to
deforestation.

Deforestation threatens the environment.
And it affects human life.
Forests make the earth habitable for humans.
Forests make the air worth breathing.
Forests provide accommodations to more wildlife.
Forests help
to rain on the earth today.
Forests prevent climate change.
There are many such benefits
from forests to the Earth.

(21)
Human Life

Human life is precious.
Good deeds should be the goal of human beings.
Humans are considered as superior,
among all kinds of living-organisms.
Hence humans
that's why,
things are done should be superior
because human beings are the best
among all types of living-organisms.

And what are these noble deeds :
Humans should be charitable,
it means
having supportive feelings to all
human beings.
Each Human should help to
each human
in any case
as much as they can.
Every man should be kind.
This kindness to another human being
should be done as real behavior.
People should be helpful.
Must be visionary.

Endurance qualities should be in all humans.
Humans must be lovers to
all the people.
All people should
acquire knowledge and skills.
Every man should be humble.
Every human being should have
quality to give up.
All people must be intelligent.
All the people,
must be disciplined.

All people should have changeable quality
because of this quality,
all people can easily reach the correct conclusion.
All people should have resilience quality.
All the people
must be honest.
It's good that people have courage.
All men have their faults
and,
it is necessary to have the quality of accepting easily.
All people also should have sympathy quality.

All people should have the most important quality that is Gratitude.
It is good for all people to have the virtue of generosity.
Better for all people to respect others.
All people should be honest.
If all the people of the World will develop many other great qualities of this kind,
in human society then
peace, progress, justice, etc. will be fulfilled by itself.

(22)

Friendship

A good friend to all men may not be possible to obtain.
 It's just someone
 may get good luck.
 But of all men
 their best friends
 may be theirs own's
 parents
 and,
 brothers and sisters and other all members of family.
 Need of a good friendship of each person
 may be fulfilled by their parents.
 To all men their own
 parents are the best friends
 of their children,
 but in addition to this,
 there are
 some are good friends,
 I am going to explain a little about this as the
 Poetry form.

To a good friend,
 any friend,
 everything of them
 can express.
 And in need
 from a good friend
 may receive
 positive suggestions and
 other valuable contributions.
 Thus received from a best friend
 valuable suggestions and
 unlimited helps provide them unbounded encouragement.

A good friend
 always stays together in every moment of life
 in sorrow and joy
 too.
 A good friend
 stays together
 when his/her friend is sad.
 Their mind too
 hurt
 and they cry too
 if that was very sad.
 Even in moments of happiness
 like you,

your friend also feels happiness in the form of non-artificial.

This is what good friendship is all about.

(23)

Thirst for knowledge

The search for knowledge by the human brain
does
unlimited.

Perhaps of animals
even by different species
they usually search for knowledge

I think,
because

let's say
of cow

the calves

milk from their mothers cows,

they learn to eat after birth,

this is also a knowledge.

When a human-child becomes
curious

since then,

the knowledge of science-research begins,

and,

this work is for every person

throughout his/her life

keeps going.

Human society so far

all scientific discoveries achieved

it is because of the thirst for knowledge.

And human society until the future

will receive

many inventions

these also becomes possible by thirst for knowledge of humans.

Until today,

humans indescribably in all areas

are able to make developments

because of thirst for knowledge,

for example,

like,

in medical sciences today

about healing humans diseases,

many things have been succeed,

and

research works are happening

for those that are unable to succeed.

Similarly,
writers,
literary persons,
poets,
philosophers,
scientists,
etc.
are searching something
new discoveries,
because of the thirst for knowledge
by carrying out research activities successfully.
Human society day by day are receiving new inventions
from these research works.
And their journeys
like these
will definitely be able to
advance the human society.

(24)
Imagination

Imagination can go far.
According to me,
imagination is the root to all inventions.
Imagination to make discoveries
motivates searchers.
Imagination is indeed a powerful function of the human brain.
Humans' physically
untouchables things
can be touched in a moment by imagination.
The imagination of all people
not the same for each person,
it's person to person different.
Some people have
excessive amounts
of imagination,
and some humans have
only a small amount
of imagination.

According to Dr. Murray Hunter of
University of Malaysia Perlis
as he proposed
we use
eight types
of imagination,
like,
effective imagination,

intellectual or creative imagination,
imaginative imaginary imagination - this Imagination helps to build
stories,
plays,
poems,
pictures,
etc.,
sympathy imagination,
strategic imagination,
emotional imagination,
imagination related to a dream - this imagination is a dream,
which we see in our sleep,
and the eighth kind of imagination is,
imagination related to reconstructing memory imagination.

People with strong imagination
become a great poet,
some become ordinary poets,
some become great scientists - for example,
like,
Albert Einstein - this guy is one
Great forever
to be a scientist,
some become just ordinary scientists,
some become great writer,
some become ordinary writers too,
some become great philosophers,
some become mere philosophers,
etc.,
etc.
In this way,
people with different abilities,
develop in human society,
according to their imagination.

(25)

If the goal is great, the paths for achieving the results will be made by themselves

All kinds of great goals,
to achieve successes are enough.
The successes of all such kinds of great goals are certain,
for example,
like,
the goal of making India independent was great,
and it became successful.
In this movement,
the people of India themselves
came forward in large numbers against the British regime.
And they took participations in this freedom movement against British

until independence.

A time when these Indian people's
unity was seen by British,
then
they gave up
on the 15th day of August 1947.

In this year and date the nation of India
was become independent.

Similarly,
in opposition to the Rana rule of Nepal,
Nepalese people
fought as one.
Then before the power of the Nepalese people,
Rana rule
was forced to kneel.
In the same way,
the dynasty of King Birendra was destroyed
behind
Nepalese people wanted democracy.
And won.
This goal was a great goal and
became successful.

So is every individual's personal goal
but goals that are related to the good of society achieve success.
This is why some people have become lawyers,
some people have become teachers - from elementary schools
to universities,
some persons became administrative officer,
some persons became magistrates,
some people have become doctors,
some people have become engineers,
some people have become scientists,
some people have become writers,
some people have become poets and poetesses,
some people have become philosophers,
etc.,
etc.

(26)

The neighbor

Every house's
people have neighbors.
The neighborhood acts as an army
for another neighbor.
If someone attacks his/her neighbor,

his/her neighbors help them
in opposition to the aggressor.
One house has many neighboring houses.
Communication with these neighboring people
of each neighboring people
should be very good.
Someone has enmity with someone.
Attempts to maintain good relations with each neighbor
but despite such an effort
relationships may deteriorate.

Each household has its own
nearest another house
as a neighbor,
even in urban areas
people in every household need neighbors.
But the neighbors of people in urban areas and people in rural areas are somewhat different due to geography.
Neighbors in the city zone there are each nearest house's people will be neighbor of each other house but there
are in the city zone
the people of next door are also their neighbors.
But since there are many floors in the same house,
people from every floor are
neighbors of every floor each other.
And even in one flat there are many rooms,
people from all these rooms
they are neighbors of each other.

(27)

In my life-journey, my inspiration is also with me

There is no difference between a inspiration and the person who inspires.
You are with me wherever I visit.
I had now come abroad to indulge my heart,
and you are with me as an inspiration.
And also you inspired me to create this poem.
Therefore you are very great.
You have inspired me to think about these things along the way,
and,
you have given birth of a Poem that is "In my life-journey, my inspiration is also with me".
So that you are truly great.

There have not been many such conversations with you until today.
Because you haven't yet
by talking to me,
and you have always tried to
get rid of yourself completely
from talking to me.
And again these days

you have become offline,
first always mostly all night
you are the person who became online for me.
And after this I had requested you to come online
but you didn't accept my request.

Maybe it's your own intelligence
because
you know that
finally in our love
reconciliation is not possible at all.
And you didn't want even to give up me.
And don't even tell me you love me.
But I know
you like and love me too,
as I did you.
I deleted all the posts of your messenger,
after deleting
you would not have been angry
because after this
I again prepared your messenger's posts better than before,
so that you became happier than before,
I have felt.
And
even if you are in a similar situation,
it shows me
by the meetings between the two of us after I deleted all the posts of your messenger,
it made it clear that you are not becoming angry with me and now really I found you in happiness.

The existence of such kinds of thoughts within you about me
I think that
this is your intelligence,
because you know very well that
after all we
do not succeed in love.
Of course,
the union between the two of us
never is possible
and you
with me
like this
don't even want to love.
Again you know well about my
never
unforgettable love
to you
therefore
I know,
right now

what you think and
you have decided
about
me.

I think you would like to see me
as a successful
Literary Person,
and want to make this literary journey a success,
by creating
suffer to feelings of separation
in love
in my heart.

To do such a big job
you need to suffer like me
by the pain of separation in love.

And now I've found you
willing to do this,
therefore

you are a great person,
I think.

And also,

I think that
you are a great woman
having great qualities like great people.

I also

Unbeknownst

started to love you,

I know that too well

between the two of us

the union is unlikely to happen any day,

even knowing this

I started loving you.

And I'm still doing it,

my love is

strange,

I just want to love you,

literally I am not hoping more from you,

you know this very well,

I really if you did not give

suffer from separation

I can't even succeed in love

also can't be a successful writer,

and my dear lover,

I would like to welcome

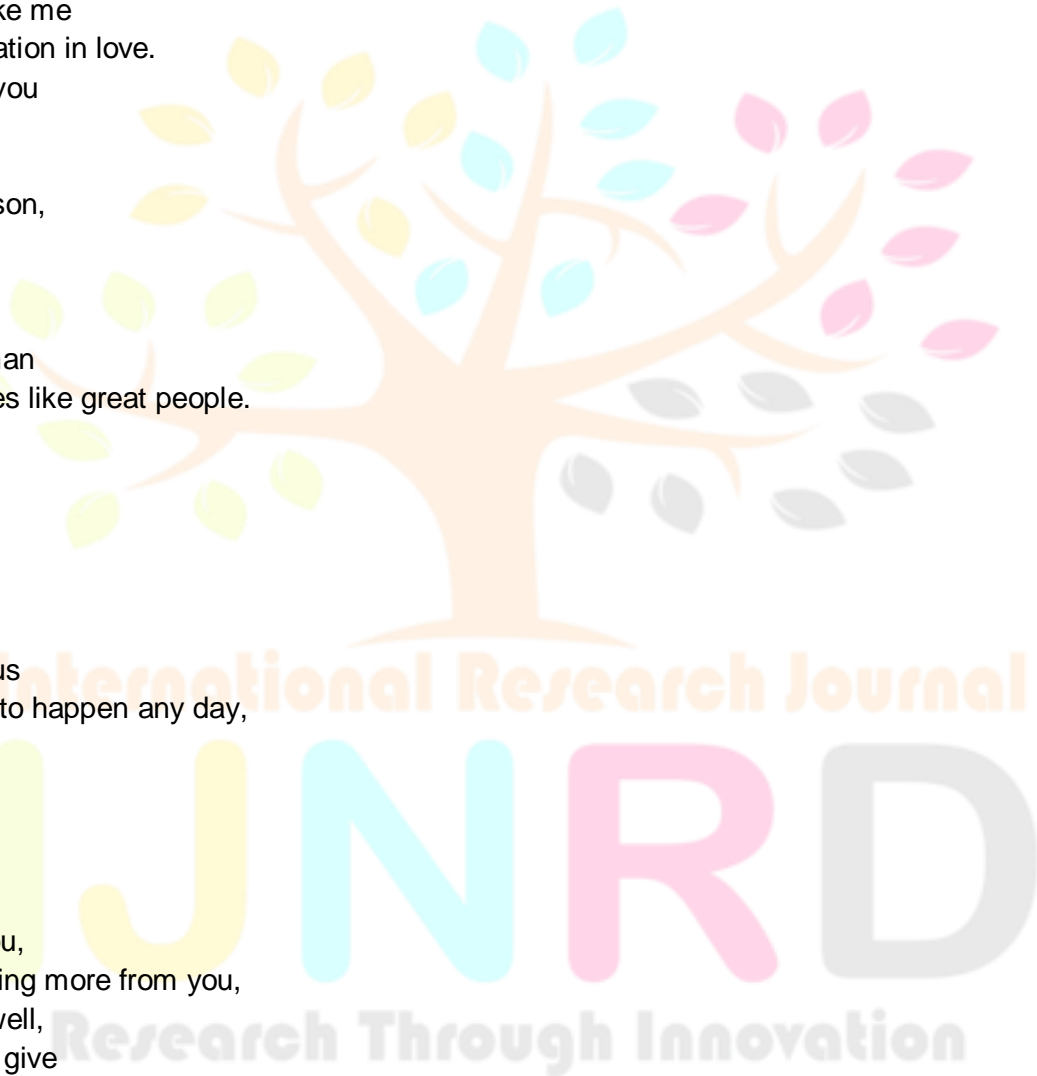

this decision of yours

from the bottom of my heart,

but

my dear darling,

by making you online

have
conversations
with me,
Please do it !!!!!!!!!!!!!!!

(28)

Poetic imagination of the poet/poetess

Not all people can become poets/poetess,
these are innate qualities.
But also those with such qualities
sometimes
they are hiding
becoming from
poet/poetess
due to
they are involving
other areas.
These hiding people
can be poet/poetess
by composing and writing poems
if they will join in this areas of literature.

But someone people
though they have innate qualities for composition and writing poems
yet they need motivations,
without motivation
such people can't be
poet/poetess,
One of these
I myself am a prime example.
I had the qualities of composing poems,
but even after trying several times alone
I couldn't even write
the letter "P" of the Poem,
but when I
get inspired,
then
I could write epics too.

These qualities too
not all are equal,
some have too much
and they
not only does a poet/poetess become a great poets/poetesses.
In people who have
the qualities of becoming great poets/poetesses really their compositions will be of highest qualities,
such highest qualities

compositions
make them
great poets/poetesses.
If there are not enough to be
great poets/great poetesses,
they only become
poets/poetesses.

These qualities of great poets/great poetesses
can reach very far,
and,
their compositions also become excellent,
to such people
such excellent qualities develop
great poets/poetesses,
but
those with little poetic imagination
can't become a great poet/great poetess,
only become poets/poetess.

(29)

Speed of mind and speed of poetic imagination of poets/poetesses

No difference was found in the speed of mind and the speed of poetic imagination of poets/poetesses.
All people's minds are not equal.
The velocity of some people's mind can reach very far,
but some people's
can't.

As same
the speed of some people's poetic imagination also can reach
far away,
but
some people's
poetic imagination
is completely opposite.
Who have a very strong poetic imagination,
those types of people
can develop them
as the great poets/poetesses,
and whose speed of poetic imaginations
are deficient,
these kinds of people
only become poets/poetesses.

All people have minds,
and the speed of the mind is also there,
but all people cannot become
poets/poetesses.

The people who
are great poets/great poetesses
even the speed of their poetic imagination
can reach far away
and such kinds of poetic imagination
can create excellent poems
that make them
the great poets/poetesses.
There are some people
whose the speed of the poetic imagination
can't reach very far,
such kinds of people only
can become
poets/poetesses.

(30)

I like reasonable cold and reasonable hot

I don't like cold very much,
I like reasonable cold.
The heat is also excessive
I don't like
I like reasonable heat too.

As the amount of heat increases
it affects
to all the creatures of the earth.
Due to excessive heat
many creatures will die
because of excessive amount of heat.

Even in extreme cold
the poor people who don't have
plenty of warm clothes
it can even lead to death.
Likewise for other creatures
the extreme cold
can lead to death.

And I dislike both extreme cold and extreme heat,
so me
a reasonable cold is
suitable for all living-organisms.
As same
I like
reasonable hot too
for all living-organisms.

This kind of weather
there is
only in imagination.
Nowhere in reality.
In the Earth
there are both
extreme cold and
excessive heat.

(31)

Do all existences have life ?

All existences have life.
All of us know that humans have life.
In a similar way,
according to science
Living-Organisms,
have life.
These Living-Organisms are
divided into different species,
like,
human species,
bacterial species,
animal species,
etc.,
etc.
There is life
of these different species.
And all these creatures
are made up of
atoms of different elements.

What science calls Non-Living-Organisms,
I think that,
all these have life.
As evidence I would like to mention that,
science has mentioned that
Non-Living-Organisms
like the atoms of different elements
have no life,
but they have life I think,
because
the atoms of different elements are the building blocks of those organisms to which
the science says living-organisms.

How
the organisms
to which
the science has mentioned as
Non-Living-Organisms,
can create the organisms to which the science has said living-organisms ?
According to science
atoms of different kinds of elements
are Non-Living-Organisms,
if it is correct,
then
how the atoms of different kinds of elements can
create the living-organisms that have life ?
Think.

And all existences have life.
But all existences don't need
blood circulation in their bodies
to stay alive like
other some living-organisms,
for example,
in human bodies blood
circulation is necessary to stay alive,
if there is no blood circulation
in human bodies
then
they can't stay as alive.
But other some living-organisms
don't need
blood circulation in their bodies to stay alive,
for examples,
trees,
fungi,
plants,
microscopic algae,
bacteria,
any of these living-organisms,
there is no need of
blood circulation in their bodies,
without blood circulation
they can stay as alive.
Like the same,
various elements'
atoms can stay as alive
without blood circulation in
their bodies.
So that,
all existences of the Universe have life.

(32)

Will not be tested my Element Therapy?

What is this Element Therapy ?

Element Therapy is a treatment method

that is related to balancing the imbalanced state of different types of elements into human patient's body according to equal level of all kinds of elements of another a healthy and young human body.

The act of balancing different types of imbalanced state of elements of a human patients body, according to exact percentage of different types of elements of a healthy and young humans body is called Element Therapy.

This method is applied to cure all kinds of diseases of humans.

What can this Element Therapy do?

Element Therapy can cure all kinds of human diseases, this therapy can

bring back

the old state of people

into the young state,

this therapy can again to create

new and functional organs

naturally in the places of

congenital organ deficiencies

of the people,

this therapy also can create naturally

new and functional organs

in the places of damaged organs of the people,

and it can help

people

to achieve immortality,

also it can revive the

dead people.

Such an important medical practice have the scientists of the world received ?

I have sent letters them

through their emails

with a request

for testing it

and apply in humans

to cure diseases.

It cannot be tested by me

because

I couldn't test it

lacking the necessary scientific equipment,

but where I sent this Element Therapy with a request for it's testing

there were all required scientific tools for testing of Element Therapy.

But since there hasn't been a test for a long time today,
I wonder if this Element Therapy won't be tested ?

Link to Element Therapy

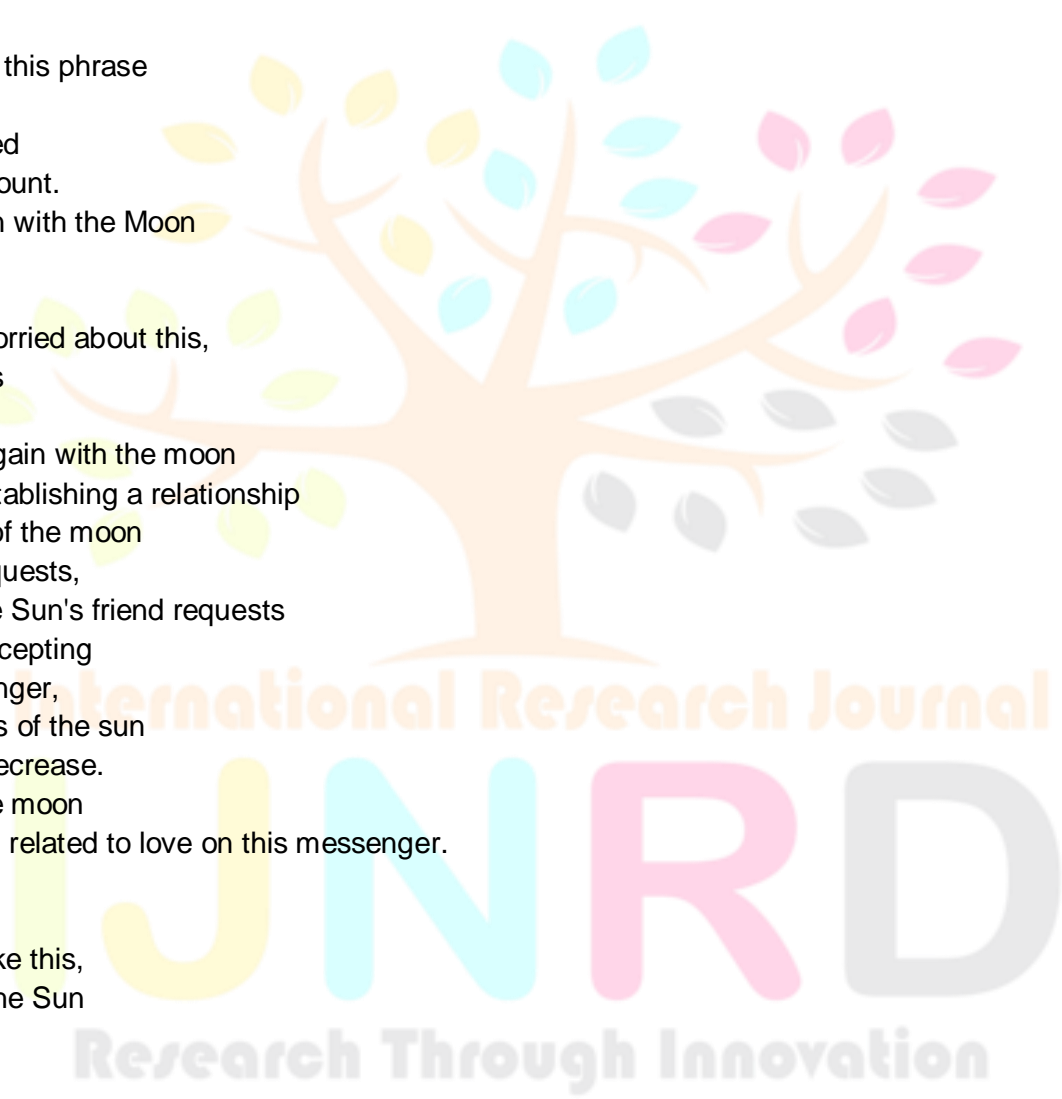

<https://ijesir.org/wp-content/uploads/2022/05/01000121IJESIRnew.pdf>

(33)

To the moon, a love offering from the sun

One day the sun
had written a phrase "I love you"
to the moon
on her facebook,
along with reading this phrase
by the moon
she had deactivated
her Facebook Account.
Now the Sun again with the Moon
can't connect
via Facebook.
The Sun is very worried about this,
a few days like this
spent,
one day the sun again with the moon
with the goal of establishing a relationship
on all Facebooks of the moon
send the friend requests,
The Moon to these Sun's friend requests
in exchange for accepting
turn on the messenger,
now some stresses of the sun
are beginning to decrease.
Now the sun to the moon
shares his feelings related to love on this messenger.

Many days pass like this,
the Moon also to the Sun
becomes soft.
Now the moon
all nights for the sun
started being online on Messenger.
Moon knew that
because of gravity
the meeting between the Moon and the Sun would not be possible.
But it's love after all,
love can't think
about the matter whether it is possible or impossible.
They each other
started to love.

As the days went by
one day the Sun
was watching the news feed on his Facebook
and saw a friend request ad
on her Facebook,
the Sun felt love
when he saw her facebook friend request ad
because
that Facebook friend request ad
was two lovers
facebook's ads that they were always online,
and he clicked on add friend,
as soon as the Sun
had been appeared on the
Moon's facebook as
friend request of the Sun.

The sun knew that the moon didn't
accept his friend request
because he sent friend requests
to her all facebook
but Moon didn't accept.
For this reason
since sending the request
by the sun
to the moon
several messages were sent through messenger
to his Girlfriend
with a request to accept
and the time was fixed
it was 12 A. M.
if the moon even at this fixed time
Sun's friend request
if not accepted
the sun
will be forced to delete
all posts of Messenger of the Moon
but
by the moon
the facebook friend request
of the Sun
did not accept,
A that
the sun deleted
all posts on Messenger
of the moon.

Now the conflict between these two lovers
begins.

Probably between these two
no one thought that
this event may lead to a breakdown,
but it happened,
and from that day
the Moon completely
stopped being online
with the sun.

Even now,
the Sun's efforts are continuing
to bring the Moon back online,
but
the Sun's efforts to the Moon
no effect.
The sun gets tired
for bringing back the Moon online again.
It might even be the end
between these two lovers
in their
love affair.

(34)

How were creatures created on earth ?

A supermassive black hole named Sagittarius A
created our Milky Way Galaxy,
this Galaxy is made up of many Solar Systems,
this includes our Solar System too.
While creating the Milky Way Galaxy,
the supermassive black hole named Sagittarius A
also created
our Solar System
and the existences of the beginnings
of all kinds of species
that we see on Earth today.

This has made it
possible for different types of species of different kinds of creatures
to be created on the Earth
in a continuous manner
and
it also created
the Oceans in the Earth.

This Supermassive Black Hole named Sagittarius A,
when it created the first generations of various species we see on Earth today,
which we know in the language of science as Living-Organisms,
gave birth to them

and were known as the original creatures of creation
 of which we know in the language of science as Living-Organisms today,
 when these creatures started needing food
 then we understand that the female humans we see on Earth today provided their unborn children with their own
 bodies when they needed food and similarly,
 the food needed by the first creators of these Living-Organisms would probably have been obtained from this
 Sagittarius A. When our Solar System came into existence,
 the food required by these early creatures started to be obtained from the Earth,
 and the creators of these various species started giving birth to their own species,
 the oceans also started flowing on the Earth.
 This is how creatures were created on Earth.

(35)

The country of the talking chickens

A country was of chickens,
 these chickens could speak
 apart from the chicken language they could also speak English because English is an international language.
 And they had accepted the republic as a political philosophy in their country.
 Their other neighboring countries were human countries.
 These human countries could not directly attack the country of these chickens because the country of these
 chickens was a sovereign country and was also a member of the United Nations.
 Therefore,
 it was not possible to attack without a good reason,
 but after losing the war,
 people wanted to make these chickens a countryless and raise them in their homes so that people could eat the
 meat of the chickens.

Within these chicken countries, there were chicken soldiers, chicken scientists,
 chicken doctors to treat diseases, chicken teachers from primary schools to universities,
 everything that existed in human countries was in the chicken countries.
 There were chicken poets/poetess, chicken journalists,
 chicken writers,
 chicken actors and actresses.
 One day,
 a conference of all the countries of the United Nations is held at the United Nations,
 in this conference,
 a chicken speaker gives a speech
 after listening to the speech
 the neighboring countries of the people change their views because these countries of the people were not as
 weak as they thought,
 this country of chickens has become a superpower in the world. The countries of the people who are thinking of
 attacking these chicken countries know the truth. And when the representatives of these people reach their
 respective countries,
 they started campaigns throughout their countries to ensure that from now on,
 none of them will eat chicken meat.

(36)

Bees

There are an estimated 20,000 species of bees,
the house where bees live is called a hive,
bees suck nectar from flowers,
and from this nectar they produce delicious honey.

This honey is a food reserve for these bees and their offspring bees are very disciplined
bees are very hardworking
they live in joint families.
They have a queen,
everyone respects their queen.
It is good for humans to learn discipline from bees.

When there is more than one queen in a hive,
the bees separate.
Honey produced by bees is beneficial for human health
honey is a nutritious food
it has antibacterial properties
honey from bees also works as a home remedy
and alternative medicine.

Vitamins,
minerals,
and antioxidants,
are found in honey.

It also contains flavonoids and phenolic acids,
which help humans for health benefits.
Honey has the ability to cure coughs and sore throats,
and it also helps humans for digestive function.

Rice Production

Rice production is an international agriculture
in rice-eating countries
the surplus rice of any country is sent to the countries that need it.

In exchange,
the products of those countries that are needed by their country are imported into their country.
This commercial relationship is called import and export,
export means sending and import means bringing.

There are different types of rice, the rice found in India is of different varieties,
such as,
Indica,
Japonica,
Glutinous,
Basmati,

Jasmine,
Arborio,
Black rice,
Brown,
Sushi,
etc.,
etc.

Irrigation is necessary for rice production
when the rice ripens
it is harvested using modern science and technology
after bringing it home
the work of extracting the grains can also be done using modern technology.
Similarly,
when it is planted,
the work of sowing can also be done using modern technology,
for example,
a tractor can be used to complete the plowing work,
a planting machine can be used to complete the sowing work.
Now,
after this,
the remaining rice can be stored and sold as needed,
in this way,
the traders of the country also import and export this grain.

(38)
Waiting

If the thing someone has waited for is easily achieved
then the person who is waiting feels happy,
if the thing someone is waiting for is not achieved,
then the person does not feel happy.
Dissatisfaction is felt.

Waiting can be in everything,
for example,
students who have given exams can wait for the results,
a person who has gone far to travel and is returning home and if the train is five hours late,
that person who is waiting at the station feels uncomfortable.

Some people can wait for someone online,
some people can wait for health benefits,
some people can wait for prices to decrease and increase.
In this way,
the word waiting can be attached to almost all things.
Passengers wait for trains, similarly,
people can wait in every thing.

(39)

Dog

Dog is a domesticated animal, dogs help people in various ways, in today's era, the trained dogs help the relevant agencies in carrying out the tasks of identifying criminals.

All dogs in the world are considered to be the same species, but there are different types of dogs, there are more than 450 types of dogs in these different types, and all these types are placed in 7 main types or groups, such as,

working group,
herding group,
hound group,
sporting group,
non-sporting group,
toy group,
and terrier group.

Working group dogs are intelligent and loyal, examples of working group dogs include,

Alaskan Malamutes,
Siberian Huskies,
Great Danes,
Doberman Pinschers,
Rottweilers,
Akitas,
Anatolian Shepherds,
Huskies,
Saint Bernards,
Neapolitan Mastiffs,
Portuguese Water Dogs,
German Pinschers,
Great Pyrenees,
Greater Swiss Mountain Dogs, Great Squirrels,
Great Squirrels,
etc.

Herding dogs are associated with herding livestock.

Dogs in this group are smart and energetic.

Dogs in this group have an innate ability to corral other animals. Examples of dogs in this group include Australian Cattle Dogs, Australian Shepherds, Border Collies, Shetland Sheepdogs, Pembroke Welsh Corgis, Cardigan Welsh Corgis, etc.

Dogs in the hound group are primarily associated with hunting tasks, dogs in this group have a strong sense of smell, examples of such dogs,

such as,
Basset Hound,
Salukis,
Beagles,
Harriers,
American Fox Hounds,
English Fox Hounds,
Beagle Hounds,
etc.

Examples of dogs in the sporting group,
such as,
English Cocker Spaniels,
Irish Setters,
Labrador Retrievers,
English Springer Spaniels, Clumber Spaniels,
German Shorthaired Pointers,
etc.

Examples of dogs in the non-sporting group,
such as,
Dalmatians,
Chow Chows,
Finnish Spitz,
Shar Pei,
American Bull Dogs,
Poodles,
Boston Terriers,
etc.

Examples of dogs in the toy group, such as,
Chihuahuas,
Pomeranians,
Maltese,
Cavalier King Charles Spaniels, Silky Terriers.

Dogs from the terrier group are associated with performing pest-killing tasks,
examples of dogs from this group are,
for example,
Airedale Terriers,
American Staffordshire Terriers, Jack Russell Terriers,
etc.

(40)
United Nations

The United Nations was established on October 24,
1945,
and until 2024,
its members are 193 sovereign states of the world.
The United Nations is an international organization,
its main goal is to maintain peace and security in the world.
Its headquarters is in New York City of USA.

The head of this organization is called the Secretary-General,
and there is also a position of Deputy Secretary-General in this organization.
This organization was established after World War II to prevent possible future world wars.

The United Nations consists of the General Assembly,
the Security Council,
the Economic and Social Council, the International Court of Justice, the United Nations Secretariat,
and the Trusteeship Council, although the Trusteeship Council has been suspended since 1994. Other objectives
of this Organization are peace and security,
human rights,
economic development and humanitarian assistance,
and the environment and climate.

The five permanent members of the Security Council have veto power :
China,
France,
Russia,
the United Kingdom,
and the United States have veto power.
The UN,
its officials,
and its agencies have won numerous Nobel Peace Prizes.

(41)
Silence

Silence is a state of not speaking, in which many kinds of speculations can be made
then it becomes a matter of interest when someone is asked something.

And the questioner starts speculating about the silence of the person he is asking.
What is this person thinking,
it will be amazed !!

The questioner speculates a lot, and also gets many guessed answers,
but none of these answers may match the feelings that the person is thinking,
but still the questioner does not stop speculating.

In this way,
the longer the silence of the person being questioned,
the more guessed answers also increase in the mind of the questioner.
Although the questioner cannot touch the true feelings of the person being questioned,
he still continues to search for guessed answers.
He also tells such guessed answers to the person he is asking the question to,
perhaps that person is also surprised !!
In this way,
when this process becomes very old,
the questioner's desire may also change due to the silence of the person being questioned for this long period of
time,

when the desire changes,
the answer may come from the person being questioned,
and in this way,
to force someone to remain silent, the questioner's question itself may not be worth breaking the silence of the person being questioned.

(42)

The Search for Soul

The soul is said to be immortal, even if the creatures die,
the soul does not die,
is there really a soul ?
This poem is searching for the soul !!
Science has decided that there is no soul in the creatures,
from a religious point of view we find the existence of the soul. When the cells of the body of the creatures remain actively functioning,
then we find the creatures as alive, when the cells of the creatures are unable to function
then we call those creatures dead creatures.

Cells in the body die,
and humans remain healthy,
when human cells do not die,
then we find cancer in the human body.
When cells in the human body die, the human body creates new cells again,
this process continues as long as humans remain alive in the human body.

Now it is necessary to reach a conclusion :
do living-organisms really not have a soul ?
According to science,
the cells of living-organisms have the ability to keep creatures alive. As long as all the cells of creatures remain functional,
we find creatures in a living state, when all the cells of creatures are unable to perform their functions, then we find those creatures in a dead state.

Religions say living-organisms need soul to stay alive but science says that there is no need of soul to stay alive to all kinds of living-organisms but their bodies' cells must be activated to keep them alive so that there is no soul in living-organisms.

(43)

Attractive

Your personality is more attractive than the natural beauty of Pokhara and the natural beauty of the Alps in Switzerland.

Your personality is more attractive than the natural beauty of the stars in the sky,

and more captivating than the beauty of the oceans.

There is nothing in the universe as attractive as you,
and you are incomparable in the universe.

There is nothing in heaven or hell that can compare to your attractive qualities.

(44)

Love

The meaning of the word love is broad.

Humans in every family love each member of their family.

This love is also shown by all kinds of creatures in the world for their children,
and those children also love their parents.

If there are others born from the same parents in this family,
then they also love each other.

In addition to this type of love, there is another type of love,
which is the love between lovers and the love between husband and wife.

The human heart also loves other creatures that it loves,
like if someone hits its dog,

then all the members of the family that gives sadness to them because of the love that all the members have for
the dog.

Another type of love is the love that people have for their country,
also called patriotism,

this love is so deep that people do not hesitate to become martyrs for the good of their country.

Ancient Greek philosophers divided love into "six" (6) parts,

such as family love,

friendly love or platonic love, romantic love,

self-love,

guest love,

divine love or unconditional love.

Again, modern writers have distinguished further varieties of love,

such as disordered love, unrequited love,

empty love,

companionate love,

perfect love,

infatuated love,

amour de soi,

and courtly love.

(45)

Disturbance of Mind

Disturbance of mind is an unstable state of mind,
there can be many reasons for creating disturbance of mind,
and if disturbance of mind be properly resolved,
the tasks can be solved properly,
if it is not managed properly,
then negative results can appear from this.

I also have disturbance of mind today
due to which my mind is not stable today
the reason for this is also the same
today I have many tasks to do these tasks are related to time and some tasks are related to government offices
while some tasks are related to non-government offices.

If I cannot manage the management properly
then some of these tasks will remain and the tasks cannot be kept to remain,
for the solution of these
I have to make plans to solve them scientifically
otherwise they will fail.

I am fully confident that I can make plans scientifically but it is not easy, these offices are not even on the same place,
the office related to one work is in one place and the office related to another work is in another place, although the distance is not very far,
they are around
but since it is related to time
even though it is close
the distance cannot be rejected.

I believe that if I move forward to solve these tasks according to the plans I have made,
then all these tasks will be solved today and I will try to achieve success according to the scientific plan I have made,
let's see what happens !!

(46)

I love you, Sun, why listen.....

I love you,
Sun,
why listen ... ,
why do I love you ?
You are the only source that makes it possible for the creatures of the earth to live,
without you life would not be possible on earth,
so that I love you.

And again,
you are the only source whose heat evaporates the water resources of the earth and creates clouds and gives water to the earth,
as a result of which it is possible for food to be produced on the earth, so that Sun,
I love you.

The Sun,
I love you because we feel warm because of the heat you provide, and all other creatures feel warm because of the heat you provide, so that I love you.

(47)

The Power of the Pen

The power of the pen is limitless This pen educates people
This pen helps in every field of work in the life,
the pen writes exams from school to universities and students write competitive exams,
makes some successful and some fail.

Because of the power of a pen, some people are hanged and some people are released from punishment according to the court's decision

Some people can even be imprisoned for a long time
with the power of this pen.

And the power of the pen is very strong.
Scientists write research papers with this pen
Writers write the creations they have created in literature
with the help of this pen Doctors prescribe medicines for patients with the help of this pen Poets/Poetesses write poems based on different subjects Journalists write various news with the help of this pen.

(48)

The Human Head

The human head is the main organ of human life,
five sense organs associated with it,
these organs are eyes,
ears,
tongue,
nose,
and,
skin.

Also,
another an important organ associated with the human head is the "human brain".

As the functions of the five senses are,
the function of the ear is for hearing,
the function of the eye is for seeing,
the function of the nose is for smelling,
the function of the skin is for experiencing touch,
and,
the function of the tongue is for tasting.
All these senses are also called sensory organs and all of them are related to the brain.

The human brain is the central organ of the nervous system,
the brain controls many activities of the body,
the main functions of the brain are thinking,
remembering,
feeling,
learning,
etc.

The human brain helps humans acquire knowledge,
humans apply this knowledge and science to their practical lives,
and develops modern human civilization.
The human brain provides mobility towards development in various essential areas of humans,
and helps fulfill human needs.

(49)

Love between Matters

There are a large number of particles of matter (Particles of Energy) in the universe, and all these particles are divided into two types of charges, such as, substances related to Negative Charge, and substances related to Positive Charge. Now, love begins between these large number of substances related to two different charges and as a result of this love, we see new substances as the creation of other substances, such as, the love of Fundamental Particles of two different Charged energies creates new substances called Quarks, these Quarks are also born with two different charges, such as Quarks related to Negative Charge and Quarks related to Positive Charge.

Now again,
from the love of these two different charged Quarks,
new substances like Protons and Neutrons are born,
and from the love of those Protons and Neutrons with Fundamental Particles called Electrons
Atoms of different Elements are created,
Atoms of these different Elements are also related to two charges, and from the love of these two different charged Atoms,
other different types of Molecules are created,
these Molecules are also related to two different charges,
such as,
Molecules with Positive Charge and Molecules with Negative Charge.

Now, from the love between these two different charged Molecules, stars,
planets,
satellites of all these planets, comets,
asteroids,
are created in the universe,
and even the different species of different creatures that we see on Earth today are created.

(50)

Modern Age People

We are modern age humans today. There is a vast difference between the modern age and ancient ages. The progress that science has made in the modern age was not there in ancient ages. Almost everything that humans need has been invented in this modern age.

Now,
to fulfill the needs that seem impossible,
people of today are searching for knowledge,
such as knowledge that can give life to dead people again, knowledge that can create new organs naturally for people who are born with a defect in some organ.

People of today are searching for knowledge that will be able to create new and functional organs naturally. People of today are even searching for knowledge to make all humans immortal.

People of the present day are searching for knowledge related to
science,
and,
technology,
to make possible those things that were thought impossible in ancient times,
such as inventing materials that cannot be affected by the temperature of stars,
and are carrying out research works according to scientific thinking.

Similarly,
people of the modern era are also searching for inventing vehicles that can fly at a maximum speed of more than the speed of light,
and people of the modern era are continuing their scientific search to acquire knowledge,
related to
science,
and technology,
capable of making our solar system immortal.
